Despite Tough Talk, Moscow Viewed as Committed to Negotiations

MOSCOW - If the only indicators were public pronouncements, it would be safe to predict a lengthy impasse when U.S. and Soviet negoti-ators meet in Geneva Monday to open talks on

ators meet in Geneva Monday to open talks on intermediate-range outclear weapons.

In the period leading op to the talks, the two sides have staked out positions that look almost irreconcilable. But if the opening bids by President Reagan and the Soviet leader, Leonid I. Brezhnev, were wide apart, there remain strong reasons to believe that neither side will readily compared their follows. countenance their failure.

One hopeful indication came from a senior . Western diplomat who met with authoritative Kremlio figures after Mr. Reagan went on television recently to propose a mutual renuncia-tion of the highly accurate multiple-warhead missiles that will be at the heart of the negotia-

The envoy reported that his Kremlin contacts advised him not to take too seriously the contemptuous Soviet commentaries on the Reagan speech. The implication taken by the diplomat was that the Reagan proposal will receive a more careful hearing in Geneva.

The initial Soviet response was to castigate the president for adopting the guise of a peacemaker while putting forward an offer he knew that the Kremlin would refuse. According to the Russians, Mr. Reagan's purpose was to defuse protests in Western Europe and thus clear the path for deployment of a new generation of U.S. missiles that would give Washing-ton a first-strike capability against Moscow's strategic missile force.

This line later gave way to a slightly more accommodating interpretation, in which the details of the Reagan offer were bitterly criticized but Mr. Reagan was rather sarcastically patted on the back for shifting from "bellicose" state-ments of his previous months in office toward a

posture that emphasized peace.

"It sounds incredible, almost fantastic, after everything that has been said and done in Washington in recent times: R. Reagan talking

NEWS ANALYSIS

peace, talking about negotiations!" the weekly juurnal Literaturneya Gazeta said in a frontpage piece last week.

Similar remarks had been made at a news conference by Vadim V. Zagladin, a Kremlin spokesman who was the first senior Soviet offispokesman who was the first senior Soviet offi-cial to comment on the Reagan proposal. But while Mr. Zagladin went on to say that the pres-ident's offer was calculated to retrieve strategic primacy for the United States, Literaturnaya Gazeta said that the "main thing" was not the "tricks" in the Reagan speech but the fact that the president was talking about peace.

What emerges from all the Soviet commentaries is the high priority the Kremlin attaches to halting the deployment of the U.S. missiles that Mr. Reagan offered to give up. Among Western diplomats in Moscow, the prevalent view is that the Soviet tactics in Geneva will depend largely on whether the Soviet leaders judge that they are going to have to sacrifice their own counterpart missiles to achieve that.

Until recently, there were indications that the Russians were banking on protest movements in the affected countries — West Germany in par-ticular, but also Belgium, Britain, the Netherlands and Italy — to derail the Western alli-ance's plan to begin the deployment of 572 Pershing-2 and Cruise missiles in late 1983. But nnw there may be less confidence that the Western plan can be thrown off course without reciprocal Soviet secrifices.

If Soviet calculations have shifted, some credit must go to Mr. Reagan's speech. Even West-ern envoys in Mcscow who have been critical of the president for his handling of relations with the Soviet Union in the past acknowledge that he chose a good moment for his offer, and that it was an offer well calculated to take the momentum out of a hithertn unusually successful Soviet propaganda drive in Western Europe.

Undoubtedly, Mr. Reagan was helped by the Soviet Navy, which had the misfortune to beach a submarine that apparently was ouclear-armed on the shores of Sweden, a neutral country that had shown strong interest in Mr. Brezhnev's proposal for a "ouclear-free" zooe in oorthern rope. That incident, many diplomats believe. nnt only underscored the risks in the Brezhnev plan, but undermined the credibility of Soviet "peace" proposals generally in Western Europe.

But what probably mattered more was the Brezhnev visit in West Germany. For weeks be-fore, the Russians made it plain that the Soviet leader's main purpose in his first visit to the West since Soviet troops intervened in Alghanistan was to foster support for the Kremlin's contention that the new U.S. missiles, not anything in the Soviet armory, constituted the immediate threat to the military balance in Europe.

This view already had strong backing among elements of West German opinion, as reflected in street demonstrations in West Berlin and in street demonstrations in West Bertin and Bonn of as many as a quarter of a million people. But the gloss that the Soviet press pnt on the Brezhnev trip — termed by Pravda "a complete success" — did not disguise the fact that Mr. Reagan, by offering not to deploy the missiles, shifted the focus of attention at least equally to the SS-20 missiles already deployed by the Russians.

Soviet unease at the shift was reflected in the excisions Pravda made from a supposedly "full text" of the approving references to the Reagan proposal that Chancellor Helmut Schmidt made at a Bonn banquet. And while Mr. Brezhnev countered with a speech in which he offered to reduce Soviet medium-range weaponry targeted on Europe by "oot dozens, but hundreds" of units, there was a feeling among diplomats in Moscow that the Russians may find it difficult to retrieve the propaganda advantage.

When the negotiators sit down in Geneva, they are likely to fall quickly into dispute over

what weapons should be on the table, the capabilities and missions of various types of missiles and aircraft in each side's inventory and the weight that should be given to the different mix of weapons maintained by each side in calculating the balance that both profess themselves cager in maintain

Soviet nfficials concede privately that these issues will take a long time to unravel and that agreement before NATO's December, 1983, deadline for deploying the first of the new missiles will be difficult. Some diplomats think that the Russians will stall the negotiations in the expectation that public opinion in Europe will force postponement of the deployment plan as long as talks are going on; nthers feel that the Kremlin may be so keen to halt the deployment that it will try to nail down an accord before the first U.S. missile is installed. first U.S. missile is installed.

Demonstrations in Italy

FLORENCE (Reuters) - Nearly 200,000 people marched through the center of Florence and 50,000 paraded through Palermo on Sunday, demanding nuclear disarmament in demoustrations organized by Italian unions.

March in Lisbon

LISBON (Reuters) — Hundreds of students marched through Lisbon Sunday, demanding the abolition of outlear arms by both East and West. The demonstrators, some of them wearing gas masks, also protested against the building of nuclear power stations.

Doubt Cast By Tass on U.S. Stand At Geneva

By Michael Getler

Washington Post Service
GENEVA — The Soviet Union reiterated on Sunday its serious doubts about Washington's intentions as U.S. and Soviet negotiators prepared to open talks here Munday on limiting ouclear

weaponsin Europe. The talks will be the second major attempt by the superpowers to get a grip on atomic armaments since the age of ouclear-tipped missiles began two decades ago. In a strong restatement of the Soviet position, Tass published a commentary, written by a senior executive of the official oews agen-

Allen Taking a Leave So He Can 'Speak Out'

WASHINGTON - President Reagan's oational security adviser, Richard V. Allen, announced Sunday that he has taken administrative leave notil completion of a Justice Department investigation into his receipt of \$1,000 in cash from Japanese journalists who interviewed Nancy Reagan.

Mr. Allen, who had withstood

more than two weeks of intensive ... public scrutiny about the case, said he asked President Reagan for the leave on Saturday because, "The interest in this case had developed to an extent that great pressures have been brought to bear on the White House."

A White House spokesman said Mr. Allen called the president Sat-urday as his ranch hear Santa Bar-

Mr. Allen's surprise announcement came as he submitted to his first public interview since the ex-

swered questions for nearly 30 minutes on the NBC News program "Meet the Press." The president, who is vacationing at his ranch, watched the Allen interview

on television.
"I fully expect to resume my du-ties," Mr. Allen said during the ap-

He Now Can 'Speak Out'

"I have spoken with the president and asked he grant me ad-ministrative leave until the Department of Justice concludes" the investigation, he said.
"This enables me to speak out."

Mr. Allen refused to say

whether Mr. Reagan supported his plans to return to his job. "I wouldn't want to characterize in any detail my conversation with the president," Mr. Allen said.

The White House spokesman, Larry Speakes, was asked if the president thought Mr. Allen had

Egypt Talks Delayed

CAIRO (AP) — Egypt has agreed to an Israeli request for postponement of the scheduled Dec. 2-10 talks oo self-rule for Palestinians in Israeli-occupied lands, a senior Foreign Ministry

official said Saturday.

Butros Ghali, minister of state for foreign affairs, said that Israel requested the postponement because members of its low-level working group were scheduled to be in Washington during the scheduled meeting. He said a new date was tentatively set for mid-

talks determined to display "good will and readiness to cooperate." When he landed in Geneva on Friday, the U.S. chief delegate,

veteran arms negotiator Paul H. Nitze, said that he would be "rea-sonable and tough" in the talks. Mr. Nitze, 74, a former deputy secretary of defense, went to West Germany on Saturday to be briefed by West German Cha lor Helmut Schmidt oo the recently ended visit of Soviet leader Leonid L Brezhnev in Bonn.

Pope John Paul II said that he had sent personal messages to both Mr. Reagan and Mr. Brezhnev "to express a vivid interest in the outcome of the occountions, toward which millions of men of the entire world have turned their attention."

The first attempt at nuclear arms control began in the late 1960s when Moscow and Washington started what came to be known as the SALT process, for strategic arms limitation talks. It was meant to put at least some limits on the growing arsenals of big, intercontinental-range missiles and bomb-ers based in the United States or Soviet Union that could devastate each other's homeland in 30 min-

Those efforts have continued on and off through the 1970s and may resume again early next year. They have met with only limited success thus far — a treaty to limit anti-missile defenses and a SALT-1 agreement, that has now expired to put a ceiling on certain kinds of

Muldoon Party Wins 2-Seat Edge But No Majority in New Zealand

From Agency Dispatcher
WELLINGTON, New Zealand - National election results Sunday showed the National Party of Prime Minister Robert D. Muldoon holding a two-scal edge over Laborites in Parliament but lacking an absolute majority.
With 250,000 absentee ballots

yet to be counted - representing one-eighth of the registered voters - the breakdown was 46 seats for the National Party in the 92-seat unicameral House of Representa-tives, 44 for the opposition Labor Party and two for the Social Credit Political League. In the previous Parliament, the

National Party had 50 seats and the Labor Party 39. "There will be no change of government," Mr. Muldoon said Sat-

urday night from the stage of the Auckland Rugby Club. The 1.8 million voters failed to give an overall majority to any party, producing the first hung Parliament in more than 60 years and giving the balance of power to the small Social Credit Political

League. An extended period of political instability and uncertainty seemed inevitable, and commentators predicted another election within a year or 18 months.

INSIDE

Sevehelles Raid

The attempt by South Africabased mercenaries to overturn the Marust government of the Seychelles is emerging as a swashbucking mission that began after a 62-year-old military adventurer was lured out of retirement and ended in failure because a customs inspector jerked open the false bottom of a suitcase. Spain Religious Shrine Believed Oldest Sanctuary Yet Discovered

By Tom Ferrell

New York Times Service

NEW YORK — U.S. and
Spanish scientists have reported
finding the earliest intact religious sanctuary from the early Stone Age at El Juyo Cave, an archaeological site in corthern Spain near the seaport city of

Santander.
The scientists said they believe that the sanctuary was built 14,000 years ago, which would make it the oldest known religious. ious shrine. Other than burial sites, the oldest shrines known previously are in the Middle East, and they are about 9,000 years old. The El Juyo sanctuary con-

tains a free-standing sculptured stone head, interpreted by the scientists as that of a supernatural being. On one side of the sculpture is the visage of a human being, and on the other is that of an animal, probably a Scholars had long hoped to

find evidence that would clearly show the existence of religious behavior of ritual in the Paleolthic Era. Cave paintings, deco-rated artifacts and burial offerings, many archaeologists be-lieve, suggest religious belief but The El Juyo sanctuary, details of which were published this

summer by the Spanish Ministry

was discovered by Leslie G. Freeman and Richard G. Klein. both anthropologists at the University of Chicago: by J. Gonzalez Echegaray, director of the Altamira Museum and Research Center in Santillana, Spain, and

sity of Santander. The excavation was financed by the Spanish Ministry of Culture and the U.S. National Sci-

by L. Barandiaran of the Univer-

The site has been known since 1957 as the home of a late Paleolithic culture called Magdalenian III, which flourished about 14,000 years ago. The sanctuary occupied about 120 square feet just inside the mouth of the cave.

A shallow trench was found in the center of the complex, containing animal bones, new and unused spearheads and other arifacts. Atop the trench was a mound about 30 inches high that contained similar offerings of bones, spearheads and other artifacts, afternating with layers of carefully arranged rosettes of

earth, Mr. Freeman said. "It was as if the builders bad scooped earth intn small cups or buckets about 4 inches across. and then inverted them on top of the mound," he said. "One

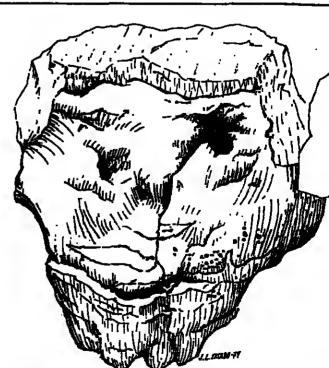

of Culture and by the History of Religion, an American journal, surrounded by six more circles, their edges just touching."

The mound was plastered over with a clay shell, and above this was a horizontal limestone slab 71 inches long, 47 inches wide and 6 inches thick, the slab weighing nearly a ton. Possible Sanctuary The sculpture, 14 inches tall,

was placed oo a smaller mound facing the cave entrance, he said. A natural vertical fissure of the rock was used to divide the stone face into two parts: on one side, the half-face of a man with a mustache and beard; on the other, the half-face of a carnivore, most likely a lion or a leopard, with muzzle, whiskers and a

single pointed tooth. In concluding that the site was a religious sanctuary. Mr. Freeman noted that a sanetuary is defined as a place where some kind of collective sacred behavior takes place. He said the collectivity was demonstrated by the large stone.

"Given the amount of work required tn move the limestoce slab, at least 10 to 15 individuals must have participated in build-ing the sanctuary," he said. "It was a group undertaking, and that suggests a shared system of group heliefs."

The left part of the oldest religious sculpture shows the half-face of a man with a mustache and beard; on the right, the half-face of a carnivore, most likely a lion or a leopard.

Mr. Freeman conceded that "there could be a lnt of collec-tively built moouments one wouldn't call ritual, if you can explain them as having some kind of technical economic use." and nated that many arrangements of large stimes, in Europe and elsewhere, were clearly de-

signed for the observation of astronomical events.
"But El Juyo is not explicable

in economic terms," Mr. Freeman said. There's a whole lnt of effort going on, nane of which is visible after the structure is built. It is not economic activi-

U.S. to Start NATO Missile Production Before Tests End

testing of an operational, mobile Pershing-2 will not take place until mid-1983. However, Pentagon officials be-

not scheduled until July, 1982. The

nowever, remagon obscuts be-lieve that the new guidance system on the Pershing-2 was adequately tested during 1977-78 shots carried out with Pershing-1 missiles. The ground-launched Cruise missile, which has already slipped two years in its testing program, has a scheduled production deci-

sion date of May, 1983, by which time more than one-third of the procurement funds will have been

The delay, in part, came from troubles the Air Force has had with the computer system for the

Software Problems

The problems we have run into have been in the development of the software for the computer, Maj. Gen. R.D. Russ, Air Force deputy chief of staff for research and development, told the sub-committee. "I think maybe we were a little ambitious when we started," he said, but added that he believed that for the 1983 date to be reached, "we need to proceed at the pace that we are going."

There has been only one test to date of a protntype transporter for the Cruise missile that led to a redesign of the equipment, the congressmen were told. "That is the way we planned it," Gen. Russ told the congressmen. "We dn not plan on building a full-scale development engineering model for the opment engineering model [of the transporter] until this year."

Testing of the missile itself is being done primarily through continued testing of the submarine-launched Cruise missile. It has been tested 58 times, the congressmen were told, and "is about 99 percent identical to the land-attack

Police, Protesters Clash At Frankfurt Airport

FRANKFURT — Youths protesting construction of a new run-way have clashed again with police at Rhein-Main International Air-

A police spokesman said the protesters, in several groups of about 100, attacked police posi-tions on Saturday along a concrete wall built to keep them from the construction project. No injuries were reported. The clash followed noisy demonstrations that disrupted holiday shopping in central

payroll during the leave of ab-Asked if Mr. Allen would be welcome back at the White House

if cleared, Mr. Speakes said, "We would have to wait and see, but I would not assume otherwise."

Bad Judgment'

During the interview, Mr. Allen continued to deny any wrongdoing but conceded he "did exercise bad judgment" in not reporting his re-ceipt of the cash to a White House

lawyer immediately.
Attorney General William French Smith has about twn weeks until he will be required by law to drop the Justice Department's pre-liminary investigation of the mat-ter m ask for the appointment of a special prosecutor to decide whether there is reason to believe Mr. Allen committed a crime.

Mr. Allen said he expected to be cleared without the appointment of a special prosecutor and added,
"I fully expect to resume my duties." He said that if a special prosecutor was named he would expect to remain on leave but not re-

In the meantime, Mr. Allen said, Adm. James W. Nance, the deputy director of the national security council staff, would take over for

Allegations of financial irregu-larities led to Mr. Allen's with-drawal last year from Mr. Reagan's presidential campaign. A newspaper article then said he had used a position in the Nixon administration to benefit financially. Mr. Allen took a leave of absence from the campaign after the article appeared but rejoined the Reagan staff after the election.

Rive Gauche

n'est pas un parfum pour les femmes effacées.

Parjums WESSAINT/AURENT

The Justice Department is now investigating Mr. Allen's acceptance of a \$1,000 "thank you" payment from a Japanese journalist. Mr. Allen has said the money was intended for Mrs. Reagan and that he intercepted it to avoid embarrassing the Japanese.

Forgot About Money Mr. Allen said he gave the mon-ey to a secretary and forgot about it. The money lay in the safe from Jan. 21, the day after Mr. Reagan's inauguration, until it was discov-ered in mid-September. ed the coup attempt.

Official sources said that neither Japanese nor U.S. officials had been able to corroborate reports from Japan that Mr. Allen had received a larger gift for his role in arranging the interview.

The Tokyo newspaper Mainichi reported Saturday that in addition

to the \$1,000 and two watches that Mr. Allen has acknowledged re-ceiving, another gift was presented to him on Jan. 18. That report appeared to have

come from a Japanese secretary, but neither the Japanese police nor the FBI are believed to have found evidence of an additional gift.

U.S. authorities were understood to believe that there proba-bly was no other gift, that the re-port probably resulted from a misunderstanding by someone not en-tirely familiar with arrangements for the interview. However, authorities on both sides of the Pacific were understood to be continuing to investigate the report.

Rift on Economy Seen at Talks on Belgian Cabinet

BRUSSELS — A rift over eco-nomic policy has weakened pros-pects of a quick end to Belgum's political deadlock through the formation of a center-right coalition government, political sources said.

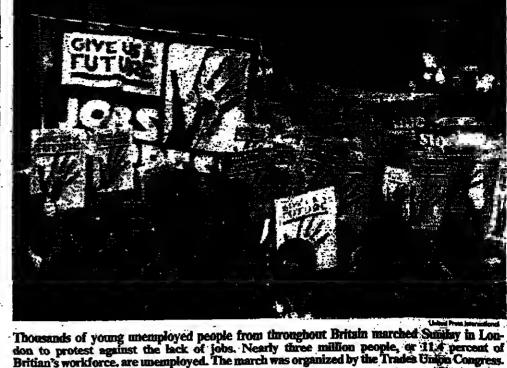

After a day of talks among party chiefs Saturday, Willy De Clercq, leader of the conservative Flemish Liberals, failed to secure the sup-port of the French-speaking Social Christians for an austerity program aimed at resolving the worsening financial crisis, the sources

Mr. De Clercq was asked to form a government by King Baudouin after inconclusive general elections on Nov. 8. He has already secured an outline accord with the three other parties that would form the coalition with the Flemish Liberals - the Frenchspeaking Liberals and the Flemish

and French-speaking wings of the Social Christians. As the talks reached deadlock he consulted the king but was told to continue his efforts, the sources said. But political commentators said the impetus for a new govern-

ment was slowing.

Mr. De Clercq said all four party presidents had reaffirmed their are to establish a Liberal-Social Christian coalition, and he said talks would resume on Monday after a meeting of the executive council of the French-speaking So-

don to protest against the lack of jobs. Nearly three million people, or 11.4 percent of Britian's workforce, are unemployed. The march was organized by the Trades Union Congress.

Mercenaries in Seychelles Attack Were Foiled by a Customs Check

By Caryle Murphy

JOHANNESBURG - The attempt by South Africa-based mercenaries to overturn the Marxist government of the Seychelles is emerging as a swashbuckling mis-sion that began after a 62-year-old military adventurist was lured out of retirement, and that ended in failure only after a curious Seychelles customs inspector jerked open the false bottom of a suit-

South African police confirmed Saturday that Michael Hoare, a former British Army tank com-mander who helped install Mohntu Sese Seko as president of Zaire, was one of 44 mercenaries arrested Thursday after the Air India jet that they had hijacked landed in Durban. The group comman-deered the plane to escape from a shoot-out at the Seychelles' Pointe Larue Airport, The battle was unplanned, crupting only after an-thorities discovered automatic weapons in the luggage of what was supposed to be a vacationing

rugby team. South African officials were reported to be "hopping mad" about the coup attempt. They insist they had nothing to do with it. "I can tell you most categorically that the South African government was not involved in the plot," Police Minister Louis Le Grange said Friday

Responsibility Claimed

[A Seychelles journalist, Paul Chow, who is living in exile in London, on Sunday claimed responsibility for the coup attempt, The Associated Press reported in London. Mr. Chow, 31, said he heads a group called Le Mouve-ment pour la Résistance that fund-

[In a telephone interview, Mr. Chow denied black African charges that South Africa was behind the coup. He would give no details of how the mercenary recruiting was organized, except to say he thought it was through "central Europeaus" and that the exercise cost "much less than \$1

[British newspapers quoted Mr. Chow as saying his group would try to "restore democracy" in a new coup. Mr. Chow was quoted as saying that the attack was orga-nized by a group of about 100 Sey-chelles exiles in London, most of them wealthy, and "a number" in other European capitals. He said they wanted to return to power James Mancham, the former president, who was deposed in a coup led by the present president, Al-bert René, in 1977. Mr. Chow said Mr. Mancham, also exiled in Lon-don, was informed of the coup attempt but did not help organize it,

the AP reported.]
The arrest of Mr. Hoare, a longtime South African resident, lent an added aura of intrigue to the coup attempt. Mr. Hoare, an Irish-born mercenary, had announced his retirement as a commando-forhire three years ago.

According to press reports in Johannesburg the mercenaries were recruited among former elite South African and Rhodesian soldiers. The band also included men from Britain and New Zealand, press reports have said. The U.S. Embassy confirmed Saturday that at least one American was in-

The men reportedly took a chartered bus to Swaziland and then a Royal Swazi Airlines flight to the main island of the Scy-chelles, 1,000 miles (1,600 kilome-ters) off the east coast of Africa.

Airport Shoot-Out

The Seychelles news agency said the men, posing as a rugby team, were trying to infiltrate the island in advance of a coup attempt, and that after arriving at the airport, they calculy boarded a bus, plan-ning to be driven to a local hotel. However, after most had board-

ed the bus, a customs clerk routinely inspecting luggage found weapons hidden under the false bottom of nne of the men's suit-

cases, the news agency said.

A search of all luggage was ordered. "At that moment," the agency quoted a policewomen as recounting, "a big man jumped out of the bus and called out, 'Get down, boys.' " The mercenaries unloaded their weapons from luggage on top of the bus and opened fire."

They quickly took more than 100 hostages and began trying to capture the airport. Then, when the Air India jet landed, the merce-

Michael Hoare

began closing in on the runway, they loaded a dead comrade on the plane and took off for Durban, the Seychelles agency said.

There were conflicting reports on whether any foreign mercenaries remained at large in the Sey-

Blast at Sikh Leader's Temple Kills 3

The Associated Press

NEW DELHI - Three persons were killed Sunday in a bomb blast at the temple of a Sikh religious leader whose recent arrest on murder charges sparked rioting and a plane hijacking. United News of India reported.

Jarnail Singh Bhindranwale, 34, was not in his temple at Chowk Meh-ta, in Punjab state 250 miles (400 kilometers) northwest of New Delhi, ta, in Punjab state 250 mies (400 kilometers) northwest of New Dein, when the blast occurred, the agency quoted local officials as saying. Mr. Bhindranwale, charged with plotting the Sept. 9 assassination of a leading newspaper editor, surrendered to police Sept. 20 after evading arrest for a week by taking refuge in his temple.

Mr. Bhindranwale's release was a major demand of five Sikhs who hijacked an Indian aircraft to Lahore, Pakistan, on Sept. 29. They were captured by Pakistani commandos. Mr. Bhindranwale was later released, but murder charges against him were not dropped.

Hondurans Vote for Civilian Leader

New York Times Service

TEGUCIGALPA, Honduras — Hondurans voted Sunday for their first civilian president in a decade, to replace Gen. Policarpo Paz García. More than 80 percent of the 1.5 million eligible voters were expected to

The leading candidates were Roberto Suazo Córdova, 53, a country doctor who heads the Liberal Party, and Ricardo Zúñiga Agustinus, 65, a lawyer who supports the army and is the National Party candidate. Because the Liberal Party won narrowly in last year's election for a Constitutional Assembly, Mr. Suazo was considered a slight favority.

But the army has placed restrictions on the authority of the next government and seems certain to remain the dominant political force. Both Mr. Suzzo and Mr. Záñiga last month agreed to grant the Superior Council of the Armed Forces a veto over Cabinet appointments, and not to sponsor any investigation of corruption in the present government or

Cabinet Changes Expected in Japan

TOKYO — Premier Zenko Suzuki will announce major changes in his 21-member Cabinet on Monday, Liberal Democratic Party sources said Sunday. The sources said up to two-thirds of the ministers would be moved to new jobs or dropped

The sources said the post of foreign minister, now held by Sunao Sonoda, was expected to go either to the party secretary-general, Yoshio Sakuranchi, 69, or to Tokusaburo Kosaka, 65, a businessman.

The finance minister, Michin Watanabe, 58, and the head of the Economic Planning Agency, Toshio Komoto, 70, were expected to retain their posts in the shake-up, which is reportedly planned to end squabbling over new trade measures.

U.K. Ex-Envoy Admits Illegal Ties

LONDON — A former British diplomat said Sunday that his love affair with an embassy maid led him into illegal links with Czechoslovak intelligence sources in Prague and London more than 20 years ago.

But after the incident was disclosed by The Sunday Times, 63-year-old Edward Scott called a press conference and denied ever being a spy, saying that he approached the Communist agents only to help his matress escape to the West. He said he told the agents "nothing of the slightest consequence. I had no earthly intention of doing anythin

Habib Resumes Lebanese Mission

BEIRUT — U.S. envoy Philip C. Habib met with a rightist militia leader on Sunday as he resumed his efforts to ease tensions over Syrian missiles in southern Lebanon and to shore up a cease-fire that he helped arrange between Israel and the Palestinians.

jet Hydd

Mr. Habib, greeted by Robert Dillon, U.S. ambassador to Lebonom, left in a motorcade of escort cars with automatic weapons protruding from both sides. He met with rightist Christian militia leader Beshir Gemayel, but neither the U.S. Embassy nor Voice of Lebanon radio would reveal details.

Mr. Habib was expected to meet with Lebanese President Elias Sarkis after visiting Israel on Tuesday or Wednesday, according to the newspaper An-Nahar. Mr. Habib also is expected to visit Saudi Arabia and Syria.

Toughest Decision

The contrast was underlined when Miss Walters asked what had been the toughest decision of his presidency and he replied, "It could have been the veto the other

It would be interesting to hear the president explain why he considers that confrootation, which he called "a game of chicken," a harder decision than his budget-cutting decisions, the decision to sell AWACS aircraft to Saudi Arabia, deployment of the MX missile nr his message to the Soviet Union nn arms reduction in Europe.

The decision-making procedure in the Reagan White House adds to outsiders' puzzlement over the

president's role. In essence, Mr. Reagan is pre-sented with options, both in writing and orally from his advisers and Cabinet members. He considers the written papers and listens to the oral arguments, but rarely makes a decision on the spot In-stead, the president's advisers announce that an issue is ready for a presidential decision, but that the president wants more time to re-

Reagan's Supporters Outspent Carter's

By Adam Clymer

New York Times Service WASHINGTON — Political action committees and other organizations and individuals spent \$10,601,864 urging President Reagan's election last fall through independent expenditures, according to a report by the Federal Election Com-

Such expenditures are not subject to any federal cootribution or spending limits.

That total was 382 times the \$27,773 spent independently in urge the re-election of President Jimmy Carter, the Democratic nominee, according to the report. And just \$3,083 was spent by such people and groups urging the election of Rep. John B. Anderson, Republican of Illinois, an independent candidate, the report said.

A Houston husinessman, Cecil R. Haden, led the list of independent individual spenders, using \$599.333 of his own money in help several candidates. The report said that he spent \$182,726 in support of John B. Connally's unsuccessful bid for the Republican presidential nominacon. He then spent \$413,221 to help Mr. Reagan. Mr. Ha-deo also spent \$3,386 tn help Rep. Jack H. Fields

Jr., Republican of Texas, according to the report. The Coogressional Cluh, run by associates of Sen. Jesse Helms, Republican of North Carolina, led the list of groups, spending \$4,601,069, all in

support of Mr. Reagan. The National Conservative Political Action Committee spent \$3,307,962, with \$1,859,168 used io behalf of Mr. Reagan. It also spent the most mooey on seeking the defeat of candidates — \$1,435,232. The bulk of that sum, \$1,067,448,

was spent on attacks on six Democratic senators. Each major party candidate had \$29.4 million from the federal Treasury in spend in the general election campaign, plus \$4.5 million more that his party's national committee was allowed to spend for him. But when Mr. Reagan and Mr. Carter accepted the money, they gave up the right to take private cootributioos. The independent groups supporting Mr. Reagan sought contributions from backers who might otherwise have given directly to his campaign. Mr. Anderson campaigned with private contributions, limited to \$1,000 per per-

The report, released Saturday, showed that independent spending was eight times greater than it had been in 1976.

A recent example came in an in-terview with ABC television taped

Congress.

Engine Breakup Brings on New DC-10 Study

By Richard Witkin

New York Times Service NEW YORK - Federal safety experts are conducting an inten-sive new study of the DC-10 airlin-- er as a result of an engine breakup that caused dangerous damage to wing devices on an Air Florida jet in Miami. In that incident, the . crew safely stopped the takeoff

The crash of a three-engine DC-10 in Chicago in May, 1979, killed 273 persons. In 1977, a DC-10 operated hy an Asian airline was damaged just after takeoff in much the same fashion as the Air Florida , plane. The crew was able to circle

and make a safe landing. In all three cases, the critical fact was that engine difficulties severely damaged high-lift devices oo the front of one wing, while similar devices on the other wing contioued to produce proper high lift. Asymmetry of this type tends to make a plane roll once it is in the air. Io Chicago the plane went ioto an extreme roll and plunged

to the ground. The DC-10's manufacturer, the McDonnell Douglas Corp., is said by U.S. government officials to be performing detailed new analyses Airport.

puzzlement.

Disturbing Tendency

The oew look at the DC-10 is but one element in a much broader inquiry into the hazards presented hy huge jumbo-jet engines that have shown a disturbing tendency to unloose rapidly whirling turbine wheels or other parts, and to damage critical systems. Incidents of this type have occurred not only oo the DC-10 but also on other jumbos, such as the Lockheed L-1011 and the European-made Airbus A-300.

On Sept. 22, the day of the Air Florida DC-10 incident, the tail engine of an Eastern Airlines three-engine L-1011 suffered failure of a rotating fan. Three of its four hydraulic systems were disabled after a takeoff from Newark International Airport on a trip to Puerto Rico. The plane landed safely at Kennedy International

time to stop before reaching the end of the runway.

Vulnerable Period at Takeoff

But some officials, who asked not to be identified, say there appears to be a "window of vulnera-bility" on takeoff in which the combination of loss of engine power and asymmetry of wing lift could be hazardous despite improvements made after the Chicago accident. This would be a period of about six seconds in which the plane would be going too fast to stop on the runway but not fast enough to prevent a dangerous

It is on this issue that new analyses from McDonnell Douglas are

being awaited. One solution that has been suggested is installation of a mechanical locking device to prevent unwanted retraction of the slats even if cables for these high-lift devices were damaged because of partial engine disintegration.

The L-1011 and the four-engine Boeing 747 jumbo have such lockmechanisms. And American Airlines, whose plane was involved away.

CAGLIARI, Sardinia - An Italian helicopter team Saturday rescued all 13 persons aboard a Greek cargo ship in distress 60 miles [96 kilometers] west of this Mediterranean island, police said. 50,000 Cuban mercenaries are deployed in Angola, Ethiopia, the Yemens and Latin America.

We Americans must view this as a serious problem and a threat to peace and stability." he said. He said there are about 3,000 Cubans in Nicaragua, some work-

ing in education programs or on development projects, but nthers involved in military assistance. Mr. Haig charged that Cubans are engaged in "subversion, propaganda and interventionism" in Co-

Oslo Papers Say

The oewspapers said Col. Ma-karov and Mr. Tchebotek, who worked at the Soviet Embassy in Copenhagen in the 1970s, were mentioned in Danish police reports on the arrest Nov. 4 in Den-mark of Ame Herloev Petersen, a writer and chairman of the Danish Committee for Peace and Security, who allegedly carried out paid ser-vices for the Soviet Union.

lombia, Guatemala, Honduras and El Salvador.

He noted that Cubans are still in Angola, and he added that Cuba has a "substantial force in Ethiopia, which is today in close at alliance with South Yemen and Li-bya, in a pact which is dedicated to overthrow the leadership of Saudi Arabia."

Ethiopia, Libya and Southern Yemen joined in a pact in August with the reported aim of coordinating their military forces "to e combat activity by imperialist, Zionist and reactionary circles."

3 Are KGB Men

The Associated Press

OSLO - The Norwegian special police have asked the Justice Ministry to declare unwanted in Norway three Soviet diplomats who are alleged KGB agents, the Osln newspapers Verdens Gang and Aftenposten reported.

Citing informed sources, they said Saturday that the three are Col. Alexander A. Makarov, the embassy counselor; Stanislav L Tchebotek, one of the embassy's eight first secretaries; and an unnamed employee at the Soviet trade delegation. The police and the Justice Ministry refused to comment on the report. Soviet Emhassy called it "completely groundless."

By Bernard D. Nossiter New York Times Service

UNITED NATIONS, N.Y. China has tentatively proposed a compromise to settle the deadlocked race for UN secretary-gen-eral, suggesting that the next fiveyear term be divided between the incumbent, Kurt Waldheim of Austria, and Foreign Minister Salim A. Salim of Tanzania.

U.S. officials said Friday that Peking had informally sounded out Security Council members on several proposed compromises.
One calls for Mr. Waldheim to be reappointed for two more years and for Mr. Salim to take over as secretary-general for the remaining

Both have struggled through 16 inconclusive ballots in the past month. China has vetoed Mr. Waldheim's bid for a third five-year term on every round and the United States has voted against Mr.

Salim every time.
U.S. diplomats are skeptical of the split-term suggestion but re-gard it as an indication that China is uncomfortable with the deadlock and seeks some resolution. One Western council member said, however, that the four other permanent council members - the United States, Britain, France and the Soviet Union - had made it clear they would not accept a di-

Breach of Charter Feared

U.S. officials say they fear the Chinese proposal might breach the United Nations Charter, which empowers the council to nominate and the General Assembly to approve one, not two, secretaries general.

These diplomats believe that no council or assembly could bind its successors. They acknowledge, however, that as a practical matter any deal made by the five perma-nent members would be difficult

Another objection, the diplo-mats say, is that they believe the moral authority that a secretarygeneral is supposed to have would be damaged by what they regard as a horse trade.

The Chinese have also suggested that a caretaker secretary-general fill the job until the council can agree, propusing Khwaja Mohammed Kaiser, head of the Bangladesh mission. The Chinese proposals and

other matters may be discussed Monday by the council or its five members with veto power. Mr. Zheng said his father, an American Marine named George Lewis or Louis George, married his mother, a Tianjin mill worker named Li Shuzhen, in 1946. When his mother left to join her husband in San Diego in 1947, she felt her 3-month-old baby was too young to travel and arranged to send for him later, Mr. Zheng

Chinese Man Wins Bid to Enter 'Native' U.S.

Convinced of American Blood, He Spent 4 Years Trying to Prove Origin

The decision to admit Mr. Zheng, who

is still in prison awaiting completion of paperwork, comes as a relief to State De-

partment officials who have conducted

several fruitless efforts to find documenta-

ry support for his story. His illegal trip to

Hong Kong made them particularly un-comfortable since Hong Kong law now re-quires that all illegal immigrants be sent

But after the Communist victory in China and the Korean War, Mr. Zheng said, his relatives burned all evidence of their American connection.

Mr. Zheng said in an interview in 1979 in Peking that he was not told that he had an American father until 1972, when President Richard M. Nixon visited Peking and official U.S.-China relations resumed.

Dozens of Letters

In 1977, he began a concerted effort to reach the United States and find his par-ents, writing dozens of letters to U.S. officials, visiting the U.S. Embassy in Peking many times and selling his blood at least nine times to hospitals to finance his

After he began his search, Mr. Zheng

said he was denied admission to the Chinese Air Force and was no longer allowed to read special Communist Party bulletins circulated in his construction company because of his assumed but unproved forcign connection.

He continued to meet official U.S. visitors with a winning smile and a charm that even got him past the security guards at the Peking Hotel, who usually stop all unanthorized Chinese.

His search apparently became such an obsession that he tended to lorget his wife and small child back in Tianjin. In 1980, his wife wrote to a Peking-based American reporter asking if he could find her husband and tell him to come home he husband and ten min so come none re-cause their second child was about to be born. Mr. Zheng would be able to send for his wife and children after establishing. residency in the United States.

In May, Mr. Zheng reached Hong Kong and went into hiding. According to Rep. Schroeder, a U.S. consular official helped persuade Mr. Zheng to surn himself into the Hong Kong authorities and then persuaded the same officials to hold him in Hong Kong until his case could be considered further in Washington.

Mr. Zheng is expected to continue his Mr. Zheng is expected to continue his search for his parents, and while officials do not have great hope he will succeed they consider him lucky to be getting out at all. Officials in Hong Kong said Friday that Mr. Zheng would be allowed to leave as soon as U.S. authorities produce an air-line ticket for him. line ticket for him.

OAU Agrees on Chad Peace Force But Questions on Mandate Remain By Alan Cowell

Senegalese soldiers, members of an OAU peacekeeping force, arriving in Chad's capital.

NAIROBI - Five African nations have formally agreed to the deployment of peacekeeping troops in Chad by Dec. 17, the first such force assembled by the Organization of African Unity.
President Goukouni Oueddei of

Chad met into the early hours Sat-urday with Daniel Arap Moi, Kenya's president and the chair-man of the OAU, and officials from four of the six African na-tions that have pledged to contrib-ute troops to the force. The 5,000 OAU soldiers will replace Libyan

troops who have been withdrawn. Although the African officials agreed on the Dec. 17 date for the arrival of the peacekeeping units in Chad, they left unanswered the question of the force's precise

fered logistical support.

Mr. Goukonni said his army,
made up of fighters from some of
Chad's 11 political factions, was between warring factions.
Last December, Mr. Goukouni
invited Libya to send troops to not capable of defending the country against "unruly elements."

"If our young army is not able to maintain order, and the Organihalt the warfare. He asked them to leave last month, and they did so precipitously, prompting a renewal of fighting in the east between government forces and troops loyal to former Defense Minister Hissène

zation of African Unity hesitates, the Chad government has the right to appeal to friendly forces to come in and put down a rebel-lion," he said. At a news conference after the weekend meeting, Mr. Goukouni

Libya Is a 'Friend'

In such a case, he added, the OAU "would not be able to open mouth since it could not keep peace in the country."

Asked if by "friendly forces" he

troopers and 150 Senegalese soleant France, which has promised to finance the African force, or Li-bya, Mr. Goukouni said: Why not Libya? We are not enemies.

> The OAU, which has not assembled a peacekeeping force before, is facing challenges as well as a test of credibility.

Militarily, the force will have to dislodge Mr. Habre's rebels if it is to establish control throughout the country. Reports from Chad have indicated that the rebels have seized the country's fourth largest city, Abeché, a settlement that controls ground access to the east as well as the only airfield in the

Mr. Goukouni said Saturday that the force's mandate had "not been specified," raising a question as to whether the African troops, which are to be under the com-

Outside Involvement

Another major issue is the in-volvement of outside forces. Afrinats who declined to be identified said that Saturday's communiqué was directed largely at Sudan, Mr. Habré's main backer. However, Libya and neighboring Cameroon are also interested in how Chad's lingering crisis unfolds. None of these three nations

were represented at the meeting.

Libya has demonstrated its ability to direct the course of events in Chad, first by its intervention and second by the speed of its with-drawal. Sudan did not restrain Mr. Habré's forces from occupying four eastern Chadian towns when the Libyans withdrew last month. According to Western intelligence sources, Egyptian arms are being funneled through Sudan to Mr. Habré's units.

Qadhafi Vows to Stay Out

TRIPOLI, Libya (AP) - The Lihyan leader, Col. Moamer Oadhafi, has declared that Libya will remain neutral if fighting breaks out again in Chad, the offi-cial JANA news agency reported

Analysts See Decline in Draft Pool In Russia, but No Harm to Military

New York Times Service

NEW YORK - The Soviet armed forces are facing the pros-pect of substantial declines in available manpower in this decade. but Western analysts say there is little reason to believe that Soviet military strength will suffer as a re-

These conclusions are presented by Ellen Jones in an article in Strategic Review, a publication of the United States Strategic Institute, a nongovernmental organization. Ms. Jones, an analyst for the CIA, worked for the Defense Intellisence Agency in the past.

She says those whn argue that Soviet military strength will be affected by manpower shortages overlook the ability of the Soviet Defense Ministry to maintain the yearly intake of conscripts at close to the current level.

Her conclusions are supported by intelligence analysts at NATO headquarters in Belgium, where the comparative reductions in the manpower reservoirs of the Warsaw Pact and NATO have been closely studied. The studies predict that the United States, Britain and West Germany will encounter manpower problems in the rest of

The Soviet problem as seen by Ms. Jones is that "over the next decade, the draft pool will decline by some 20 percent from its 1979

Brezhnev Praises PLO In Telegram to Arafat

The Associated Press MOSCOW - Soviet President Leonid I. Brezhnev on Sunday congratulated the Palestine Liber-ation Organization and its leader, Yasser Arafat, for opposing "the dangerous militarist plans of the United States and Israel." The congratulatory telegram, "on the occasion of the interna-

tional day of solidarity with the

Palestinian people," was reprinted

un the front page of Pravda.

to outdo Slavs in completing secondary education. The most important problem as-

sociated with the induction of non-Slavs into the services may be language barriers, but this could be exaggerated. Soviet figures show that seven of 10 non-Slav draftees have either some knowledge of Russian or are fluent in the language. U.S. intelligence sources estimate that 45 to 55 percent of conscript jobs demand some knowledge of Russian.

Conscription in the Soviet Union has been in force since 1918 and is nearly universal.

The shifts in the ethnic makeup of conscripts published by Ms. Jones are based on the 1970 census. The figures show that in 1970, the Slavs - Russians, Ukrainians and Byelorussians - made up 74.2 percent of the conscript pool. The rcentage is expected to drop to 62.5 percent by 1985.

During the same period, the Moslem pool is expected to in-crease from 13.1 to 24.1 percent. Ms. Jones and Western Europe an analysts do not believe that the conscript reservoir will be reduced

below 2 million through the end of

this century.

The Soviet forces now draw on this pool for conscripts serving two to three years, depending on the service, for a total of 3.67 million men, not counting half a million border guards, internal security troops and railroad and construc-

highly explosive.

The scope of the movement's appeal was apparent last month when more than 300,000 people gathered in New Delhi for a rally to inaugurate the Greater Hindu Society, a coalition of existing religious and cultural groups. Even by New Delhi standards, where multitudes are often assembled to promote any number of causes, the

Spurs a Hindu Revival Movement

turnout was impressive. But if the central message was one of religious pride and a reaffir-mation of Hinduism, the tactical emphasis was on eliminating prej-udice against untouchables. Discrimination against untouchables has been banned by Indian laws since 1955, but it is still pervasive against a group that comprises 18 percent of the population.

Name Coined by Gandhi

Untouchables are called harijans, or children of God, a name coined by Gaudhi in his campaign 50 years ago to remove the stigma of untouchability through religious changes and the nationalist strug-

The vulnerability of untouchables was underscored last week ligious changes by Aurobindo emerged of the slaughter of 24 of them in the town of Deoli, 300 miles from New Delhi. The victims, including women and children, were shot and killed by upper-caste landowners who were incensed that some of their untouchable field laborers had testified in a court case against them.

Mr. Singh said that Hinduism had been able to shed practices that had lost their economic or symbolic rationale. He said untouchability now served no useful purpose, because the division of labor in India no longer demanded a reservoir of people for those jobs - among them shoemakers, han-diers of the dead and toilet cleaners — that were the usual tasks of the untouchables.

Change of Attitudes Sought

Mr. Singh, a member of Parliament and a former Cabinet minister, said that while he was eager to bring an end to untouchability, he was not seeking any other modification of the caste system, which arrays thousands of groups in a hi-erarchy that has far more impact on social relations than does the Constitution or the laws of India. Caste, Mr. Singh said, is too much a part of Indian consciousness to

It is on harijans that we want to change attitudes," he said.
"Harijans must not only be tolerated but must be actively accepted and assimilated into the Hindu social structure."

Many untouchables are openly suspicious of the revival movement and its professed goal of embrac-ing them. They want to save us

Lotte Lenya, 81, Dies in New York; Star of German and U.S. Theater

By John Rockwell New York Thines Service

The Atlantia walled a support to the state of the state o

NEW YORK - Lotte Lenya, 81, a star of the German and American stage and films who championed the music of her husband, Kurt Weill, died in the Man-

hattan apartment of a friend Friday evening.

Miss Lenya first attracted widespread attention in the 1928 Berlin production of Berroit Brecht's and Weill's "Threepenny Opera," and her fame was confirmed in the film version of 1931.

Her stage career in the United States was limited until after Weill's death in 1950 But mid the

Weill's death in 1950. But with the 1954 off-Broadway revival of "The Threepenny Opera" she became a noted figure in America, subsequently appearing in numerous works of both Well and Brecht as works of both well and orein as well as supervising and singing in a series of Weill recordings that in-spired the present-day re-evalua-tion of his work. She also made a name for herself, independently of Weill, winning a Tony Award for her performance in "Cabaret" on Broadway and an Oscar for the film "The Roman Spring of Mrs.

By the late 1950s, Miss Lenya had become a symbol of the spirit. toughness and insouciance of Gertoughness and insouciance of Germany between the world wars. She and "The Threepenny Opera" properly came to represent all that was bright, glittering, sharp and trenchant about the art and the popular culture of Weimar Berlin. As a singer, Miss Lenya had her distinct technical limitations, espe-cially in her later years, when she lowered the pitch and approximated the line of Weill's songs. In a review in The New York Times, Harold C. Schonberg described her voice as one that "could sandpaper sandpaper." But through her shaky failings, or perhaps even be-cause of them, she projected an individuality, a vulnerability and a defiance that her more technically

adroit successors were hard put to Born in Austria

Lotte Lenya, whose original name was Karoline Blamauer, was born on Oct. 18, 1900, in Penzing. a working-class suburb of Vienna. Her mother was a laundress and her father one of the city's coach-men. During World War I, she was sent to live with an aunt in Zurich. She took dance classes in the local City Theater and joined its corps de ballet. "Lotte Lenya" was a stage name derived from her nickname, Lenja, and she preferred to be called Lenja or Lenya by her

In 1920, she went to Berlin, then the theatrical capital of the German-speaking world, and joined a

Kaiser and his wife, and it was through them, in 1924, that she met Weill. She was asked by Kaiser to row across a lake and pick up the composer, who was a houseguest. Miss Lenya asked how she would recognize him. The answer was, "All composers look alike." A romance developed between the two, and they were married in 1926.

The first Brecht-Weill collabora-tion was the short "Songspiel," now known as the "Little Maha-gonny," in which Miss Lenya had a part. Composed for the 1927 Ba-den-Baden Festival of avant-garde music, it had a controversial success and led to their work on "The

cess and led to their work on "The Threepenny Opera."

The anecdotes surrounding the premiere of that work, at the Theater-am-Schiffbauerdamm on Aug. 31, 1928, have passed into theatrical history. The performance was preceded by a temper tantrum by Weill, who had noticed the omission of his wife's name from the program. "Pigsty," he cried. "This is a pigsty. My wife won't go on! I won't allow it." Miss Lenya later said she calmed him by saying. "They'll know who I am tomorrow."

They did. "The Threepenny Opera," with its blend of classical formalism, jazz atmosphere and defiantly proletarian simplicity, became the hit of Europe. It ran for five years in Berlin, until 1933, and was produced all over Germany and the rest of the Western world Altogether, by one estimate, it received about 4,000 performances in 120 productions.

Emigrated to U.S.

She subsequently appeared in the expanded, operatic version of "Mahagonny," "The Rise and Fall of the City of Mahagonny," and in a piece called "Song of Hoboken" in 1932. When the Nazis came to power, she and Weill, who was leavish emigrated to Paris where Jewish, emigrated to Paris, where Brecht and Weill composed their only work written specifically for her, the drama-ballet "The Seven Deadly Sins." In 1935, she and Weill company to New York

Weill came to New York,
When Weill died in 1950 she
was at first desolate. "When he died, I wanted to crawl into a hole and never come out," she said.

But the next year Miss Lenya was remarried, to George Davis, an editor, who died in 1957. Spurred by his strong encouragement, she resumed her career and began restoring Weill's work to public consciousness. It was a task that became a mission, and it took up most of the rest of her life.

That mission began with a con-cert performance in early 1951 at Town Hall of The Threepenny Opera. Later that year Miss small company devoted to Shake. Lenya returned to the stage, ap-speare. She became a protegee of pearing as Socrates' wife in Max-the German playwright Georg well Anderson's "Barefoot in

Athens"; Anderson had been a close collaborator and friend of Weill. But it was not until the Carmen Capalbo staging of Marc Blitzstein's adaptation of "The Threepenny Opera" opened at the Theater de Lys in Greenwich Vil-lage in 1954 that Miss Lenya's U.S. career was under way in earnest. The show was such a hit that, after it was forced to close because of a previous booking at the the-ater, it reopened there the next

ater, it reopened there the next year and ran for oearly seven years, with Miss Lenya coming in and ont of the cast.

From the mid-1950s, Miss Lenya led a full-scale revival of Weill's European work. She appeared in many productions, including a highly praised staging by the New York City Ballet of "The Seven Deadly Sins;" she made a series of recordings for Columbia Masterworks, and she also worked Masterworks, and she also worked in the cause of Brecht, in the show "Brecht on Brecht," which toured

widely.

Gradually, Miss Lenya's career apart from Weill began to blossom although she tended to be typecast as a symbol of Weimar Germany. In 1966 she appeared as Frailem Schneider in "Cabaret". Her films, apart from "The Roman Spring of Mrs. Stone," included "From Russia With Love." Roman Polanski's with Love," Roman Polanski's
"What?" and "Semi-Tough."
Miss Lenya enjoyed playing
parts not written by her first hus-

Lotte Lenya

band. "When I do a film that has nothing to do with Kurt Weill, then I am happy, I am on my own," she said. "But in a Kurt Weill work I am as nervous as a cat. A burden falls on my shoulder I fad a cathing responsibilities." ders. I feel a crushing responsibili-ty." "I've been the widow of Knrt Weill," she added in 1966. "Now

I'm me!"
Miss Lenya's third husband, the painter Russell Detwiler, died in 1969. In her later years she remained active, overseeing Weill productions.

Sophie Gimbel, 83, Is Dead, Was U.S. Fashion Designer

NEW YORK - Sophie Gimbel, 83. an American designer for al-most 40 years, died Saturday of a heart attack.

Mrs. Gimbel, who was known professionally as Sophie of Saks Fifth Avenue until her retirement in 1969, was the widow of Adam Gimbel, president of Saks Fifth Avenue from 1926 to 1969. She was known more for the elegance of her clothes than for design innovation, although she is credited with popularizing the culotte or divided skirt. In the 1940s she sold more clothes than any other American designer, with the possible ex-ception of Hattie Carnegie.

Charles Edward Toberman LOS ANGELES (LAT) -Charles Edward Toberman, 101,

whose development of such land-marks as Granman's Chinese and Egyptian theaters and the Holly-wood Roosevelt Hotel earned him the unofficial title of "Mr. Hollywood," died Friday at his home. A multimillionaire who pro-moted, negotiated and sometimes financed development of the west

Natalie Wood Found Dead off California Coast

The Associated Press SANTA CATALINA ISLAND, Calif. - The body of actress Natalie Wood, 43, who starred in such films as "West Side Story" and "Gypsy," was found floating Sunday in the ocean off Santa Catalina Island, sheriff's deputies

The actress, who apparently drowned, was found near an inflatable boat 200 yards from shore af-

ter a seven-hour search by the harbor patrol and lifeguards, Los Angeles County sheriff's deputies

"She went out in the boat by herself and slipped off or fell off or jumped off. She was found floating just beneath the surface next to the boat," a county lifeguard official

Miss Wood, on location for a film, had apparently gone ashore

ing to the yactit owned by her hus-band, actor Robert Wagner. The boat and the body were aboard a power-driven inflatable found about 100 yards apart a

Mr. Bombard, who pulled her body from the water, said no injuries were apparent and the boat

with friends to visit the Isthmus
Cove area near the northern end of

U.S. Medfly Officials Fear Sabotage 1946. The next year, she played the role of the child in "Miracle on 34th Street," a popular Christmas

SAN FRANCISCO - California's troubled war against the tenscious Mediterranean fruit fly oow appears to be plagued by a perverse new enemy, a so-called "Johnny Medfly," a person who clandestinely flips dead flies into detection traps as false evidence of

By Wayne King New York Times Service

Officials of the Medfly Eradication Project are convinced that one or possibly all of three September finds south of San Francisco, which alarmed entomologists battling the destructive bug, were planted either by an irresponsible prankster or someone trying to sabotage the eradication effort.

"There is compelling evidence that someone is salting or planting flies in the traps," said Roger Blake, a spokesman for the project, in a telephone interview from the Modfly Project headquarters in Los Gatos.

At the same time, Mr. Blake and other project officials concede that while some recent finds may be hoaxes, others do not appear to be. and all evidence points to a real and continuing infestation. According to project officials, three fly finds in September are

now regarded as suspicious. "One we're almost positive was a salting." Mr. Blake said, "and one we regard as probable." But he said the third was unlikely. One suspicious find occurred in

a trap in Sunnyvale, already sprayed repeatedly with malathion. The traps are baited with

with an attractant called a phero-mone and the bottom is coated with a sticky substance. "Normally a fly gets into the stickum and sinks down to its kneecaps, so to speak." Mr. Blake said. "It struggles, and the substance gets on its

But in this case, he said, the fly

Friends Send Note **Backing Sakharov**

The Associated Press MOSCOW - Sixteen friends of Andrei D. Sakharov have sent a declaration to the Soviet parliament calling for certain conditions to be met for the dissident leader to call off a hunger strike begun

The declaration asked Soviet officials to permit Lisa Alexeyeva to leave the country. Miss Alexeyeva, 26, was married by proxy last year in Montana to Alexei Semyenov, who is the son of Mr. Sakharov's wife, Yelena Bonner, by a previous marriage. Mr. Sakharov is protesting authorities' refusal to allow Miss Alexeyeva to join Mr. Semyenov in the United States.

The declaration, handed to Western correspondents Saturday, also asked Soviet officials to allow Mr. Sakharov to leave the city of Gorki, where he was sent into internal exile in January of last year. It warned that Mr. Sakharov and Miss Bonner are "sick people, and a hunger strike, if it drags on, can lead to their death."

was simply stuck on the surface with no indication that it had struggled. Its dry condition indi-cated that it was dead before it was placed in the trap, and a crimped wing suggested the use of lorceps or tweezers.

"pretty sure someone put it in there."

along with one wild fertile female

At the same time, he said, "If somebody planted them, they had to be really good. They would have had to go to Hawaii to get a wild fly." or mise one or more from contaminated fruit.

pear suspicious. Despite such set-backs, raising the specter of an infestation next spring much larger than expected, Mr. Blake said that project officials are optimistic that the fly will be eradicated by late

A similar find in Santa Clara involving "a really desiccated sterile fly," according to Mr. Blake, was such that entomologists were

However, the circumstances surrounding another find in San Matoo County, near the town of Loma Mar, in late September, were considerably more ambigu-ous, he said. In that case, six sterile flies were found in the same trap

Highly Unusual

Although the condition of the flies suggested they were alive when they got into the trap, it was regarded as highly musual to find so many in one trap at this time of

Starting With Theater

Page 6 Monday, November 30, 1981 *

The Soviet-American negotiations that begin in Geneva Monday concern "theater" nuclear forces. They cannot really be confined to weapons in the European military theater, but they will be played mostly to European galleries. For months, perhaps years, this conference will be a stage for the propaganda war that tests the NATO alliance.

That is not a trivial function. Propaganda is the crucial first act for any improvement in East-West relations.

There can be no military balance in Europe until NATO and the Soviet bloc rediscover the advantages of such balance. And no concept of balance will work if people in the West lose faith in nuclear deterrence or the wisdom of American leadership. The Russians will not trade real missiles for planned NATO missiles until they know the allies have political support for deploying them. The Kremlin will not balance power with an America whose influence in Europe can still be eroded.

The main question, then, is not whether Washington and Moscow should have a hundred missiles more, or less, on European soil. Contrary to Mr. Brezhnev's crude pitch to the anti-bomb marchers in Bonn last week, there is no imminent threat of war. The right first question, as Chancellor Schmidt said in reply, is whether there can be a mutually reassuring détente in Europe. And that depends on whether Soviet and American leaders can persuade each other that they are pursuing parity rather than military superiority. Here is where good propaganda and policy conjoin.

Only if President Reagan proves himself a responsible leader of the West can be hope to move Brezhnev to a significant deal. The president has presumably grasped the costly consequences of his opposition to the SALT-2 treaty and his early bellicosity. Now he should understand that be cannot rest with one good speech or expect the actors in Geneva also to write the play.

Once they get down to comparing Soviet and American definitions of missile balance, the experts in Geneva will demonstrate that weapons in Europe can be limited only in the context of a larger strategic balance, embracing all allied and Soviet nuclear arms. And even a larger strategic conference — for which Reagan says he will be ready in the spring - can only provide a technical framework for larger political decisions.

To win the propaganda contest in Western Europe and thus to interest the Kremlin m major weapons reductions, the administration will have to engage the Russians in broad and persistent discussions at much higher levels. The superpowers will not overcome the mistrust that now dominates the arms debate unless they can at least acknowledge their many concerns and complaints from Afghanistan to Poland to trade to arms control. Geneva can begin the process.

THE NEW YORK TIMES.

Patience With Greece

Of Greece, Secretary of State Dean Acheson said in 1947: "It was necessary to interfere in their internal affairs in order to get them straightened out." In that period U.S. policy was patronizing, and not exactly overanxious about Greek sovereignty and sensibilities. Fortunately, that wasn't all. The policy succeeded: It did more or less "straighten Greece out." The nature of the threat to Greece after World War II is still debated, but Greece did emerge as a working democracy - not always a smoothly working one, but a place where, most years, the Greek people could decide bow they were governed.

Recently, in a sense vindicating Dean Acheson's policy, they threw ont the party associated with the American connection over the years and installed the Socialists, who had in effect campaigned against the attitude represented by Dean Acheson's comment. Their leader, Andreas Papandreou, said he would plunge first into urgent domestic concerns, but he is now deep into foreign policy. He announced the other day that, unilaterally, be wisbes to remove American nuclear weapons. He also said that, by negotiation, he intends to set a timetable to remove the American military bases and to take Greece out of the integrated military command of NATO. It is important bere that he stresses negotiating, since this puts straighten themselves out. bureaucrats into the process and slows things

down. But a further diminution of the American presence in the eastern Mediterranean is surely possible.

The Reagan administration is no less nationalistic in its way than Mr. Papandreon's is in his, and it will not be easy for it to keep cool. That appears to be its intention, however, and it is the only way to go. Greeks have to work out of their system the resentment many of them still feel at being taken in hand by the Americans after the war and at having their democracy suspended by colonels in the 1970s. Mr. Papandreou is frank to acknowledge that his country is a Balkan and Mediterranean place as well as a Western one. The West may have been thinking of Soviet Communism when it brought Greece into NATO, but Greece never had Turkey far out of mind. Mr. Papandreou's grievance against NATO is that the alliance, meaning the United States, neither guarantees Greece's borders with Turkey (it was never meant to) nor ends the Turkish military occupation in Cyprus (100 hard).

Although we besitate to put an anti-American tag on Mr. Papandreou, or on Greeks in general, a policy that will sound anti-American to many American ears can now be expected out of Athens. It is a good time for ericans to be patient while Greeks

THE WASHINGTON POST.

Restraints Don't Work

Japan's "voluntary" agreement to hold down its exports of automobiles to the United States has been in effect half a year. In these months the agreement has demonstrably done the U.S. automobile companies no good whatever. There is some evidence that it has actually increased their troubles with for-

Last spring, several of the American companies were banging desperately on the door of the White House to demand relief from the pressure of imports, primarily Japanese imports. The administration needed to do something quickly, and trade restraint was what the U.S. industry wanted. Its deeper ills - runaway wages, unpopular designs, occasinnal lapses in quality control - were all going to take far longer to correct.

With much pulling and hauling, the administration managed to extract from Tokyo a pledge that its manufacturers would not ship more than 1,680,000 cars into the United States in the year beginning last April.

In the first six months, 964,000 cars came in from Japan. At that rate imports would go well over the limit, but the limit will probably be enforced — by the recession.

While the sales of imports are down, they are not down as far as the sales of domestic cars. That leaves the imports with a larger share of the U.S. market than a year ago. And the Japanese are shipping more expensive cars, giving U.S. manufacturers more severe competition in the middle range of the price scale, where they have traditionally looked for their profits.

As the import agreement was originally stated, there was to be a second year of it with the precise numbers to be worked out later. Undoubtedly the American automobile industry will plead for even tighter controls of even longer duration. But present experience suggests that the administration would do the automobile companies a favor by abandoning the whole thing.

Other Opinion

After the Failed Seychelles Raid

The international community should not stop at mere condemnation of the mercenary invasion. The community of nations must demand full and clear answers to questions regarding the planning, financing and organizing of the invasion. It is inconceivable that the mercenaries, originating from South Africa. could have escaped the eye of the Pretoria authorities while they were planning and executing the invasion. South Africa must accept that it has to send the mercenaries now in its custody to the Seychelles for trial.

- From the Sunday News (Dar es Salaam).

The mercenaries were the familiar ragtag of South Africans, British and French who

get their living from turbulent southern Afri-can politics. Since the Seychelles have Tanzanian military training and the benefit of the usual "adviscrs," it proved a simple task to

There will be speculation that wider strategic interests played a part in the attempted coup. The Seychelles are placed close to the West's oil lifeline to the Persian Gulf, and the government has moved toward Moscow. At the last Commonwealth Conference, for example, it adopted an almost Soviet line on the invasion of Afghanistan. But it seems more likely that [ex-President] Mancham's Arab friends or wealthy businessmen in the islands, disturbed by possible nationalization policies, had a hand in the affair.

- From The Daily Telegraph (London).

Nov. 30: From Our Pages of 75 and 50 Years Ago

1906: Hope to Beat 'Diving'

NEW YORK - The Gillespie aeroplane, the invention of Mr. G. Curtis Gillespie, of New York, has been designed to prevent the "diving" propensities that have proved so fatal to many flying machines, though whether it will overcome that beie noire of aeronauts has still to be proved, for equilibrium is a problem that offers endless difficulties. The area of the Gillespie aeroplane is approximately 240 square feet, and the designer, though familiar with the advantages of curved surfaces such as are used by the Wright brothers, is confident that with the power developed by the seven three-foot aluminum propellers, the machine is more difficult in "up end" and is not so easily capsized laterally.

1931: Graduates' Prospects Dark

PARIS - Today's editorial in the Herald reads: "More men and women with sufficient training and talents that are technical and expert are needed to run a world that is continually becoming more complicated, more difficult to manage. Paradoxically, there are signs on the horizon that many of those who are now sharpening their teeth in schools and colleges will find nothing to bite on when they emerge with a degree. The oversupply of engineering students is so great in Germany that several technical organizations have begun to issue warnings to call a halt. In America, public utility corporations that used to take on 80 of the graduating class of technical schools now have room far a dozen only."

Heeding a 'Europe First' Mood Around Geneva

L ONDON — The governments of the United States and the Soviet Union are finally renewing their talks on the control of nuclear weapons, but this will be no private party. The people of Enrope are demanding the right to be heard and insisting that this subject is too important to be left to secret negotiations in Geneva between the two atomic giants.

What started as a mathematical dispute about the balance of military power be-tween Soviet missiles and NATO missiles has turned into a philosophic question involving the universities, the churches and the rising young generation that has no memory of the two world wars.

For the first time since 1949-50, when the Stockholm peace movement was at its height, the West European governments

The Demonstrators,

Portrayed in Focus

By Michiel Bicker Caartan

TEW YORK — If there is a conclusion to be drawn from the

Peace demonstrations in Europe, it is that they do not express a new wave of anti-Americanism. Even the sweeping

rope." If anti-Americanism is a strong undercurrent in West Germany, that does not have to hold true for Italy as well.

Secondly, neutralism and pacifism are not the same thing, and do not necessarily go together. Polls in Britain, Belgium, the Netherlands, West Germany and Italy show that majorities want to stay in NATO. Asked if they would resist a Soviet invasion, a sizable Dutch percentage answered that they would fight.

Thirdly, a demonstration is a messy thing. All kinds of people show up to join the walk, especially on a sunny day. The demonstrations have attracted genuine pacifists but also han-the-bombers, members of political movements such as the Green Party in West Germany, environmentalists, opponents of any form of nuclear power, and church members. And, sure enough, anti-

Americans; they have brought their banners to the bantefield, and it is those banners that catch the eye. But Americanophobes have always been part of European societies, and they do not

This is not to ridicule the motives of any protesters; it is to show that those attending mass gatherings are never present for a single reason, and that it is therefore very easy to draw the

wrong conclusions.

What has brought these people together today that a year ago

Decisions about whether to deploy nuclear missiles are drawing closer. West Germany already has more nuclear warheads

per square mile than any nther country in the world, and is to deploy new ones in 1983. Belgium, the Netherlands and Italy see atomic weapons coming their way for the first time. Hiroshima in the town square seems awfully close, all nf a sudden.

Another reason is Ronald Reagan, Nuclear bombs are ready

for use, and in the White House sits a man who seems able to

live with the thought that these horrible things will one day

actually be used. His proposal for reduction of nuclear weapons in Europe was encouraging, but it will take more than one speech to change his belligerent image.

dominate the marches. They have simply found a new refuge.

explanation of "pacifism and neutralism" seems too easy. Despite NATO and the EEC, there is no such thing as "En-

are having to pay attention now to the anti-nuclear protests, particularly in the Protestant countries of Northern Europe. Accordingly, the Northern govern-ments, and Chancellor Helmm Schmidt of

West Germany in particular, have argued to President Reagan that he could not re-store the balance of nuclear power with U.S. Pershing-2 and Cruise missiles in Europe naless he came forward with a credihie nuclear policy and began serious negotiations with Moscow.

This he has now done, but one speech is not a policy, and he is entering into nego-tiations in Geneva in delicate and difficult

.The Western allies insist that these talks

By James Reston

on intermediate range missiles involve pri-marily the security of Central and West-ern Europe. Schmidt arranged with Presi-dent Brezhnev in Bonn the other day that be would not only be informed but consulted in advance on any U.S.-Soviet arrangements at Geneva involving the se-

curity of his country.

Schmidt and President Mitterrand of France met in London for breakfast in the French Embassy Friday morning and agreed that, while the restoration of a balance of nuclear power in Europe was es-sential to a successful negotiation, they must know, step by step, what Washing-

ton and Moscow were proposing.

Meanwhile, the Soviets are obviously

So it is anti-Americanism, after all? No, it is not. People have become anxious, and are shaking trembling fists. But at whom? Who will listen? Not Moscow: Those enigmatic domes on the Kremlin seem soundproof, particularly to noises coming from across the border. Most demonstrators do not close their eyes to the Soviet SS-20s already in place in Eastern Europe. But it makes more sense to begin by convincing your own government, your own alliance.

If people shout at the United States, it is because only the United States might listen. If this shouting strains the Western alliance, it is because that is the only alliance the West European countries are members of.

Relations between the United States and its European allies will deteriorate further if Americans continue to misinterpret the criticism. It is not simply anti-Americanism but rather a confused cacophony of concern, with overtones of pacifism, intended to be heard by both superpowers.

The writer is a Dutch journalist working in the United States, He contributed this article to The New York Times.

counting heavily on the European peace demonstrations to out pressure on the demonstrations to put pressure on the governments to reject the American pro-posals for a nuclear balance. Radio Moscow is filling the air with broadcasts in English directed at the leaders of the antinuclear movement in Western Europe, and this propaganda offensive is not being matched either by the Voice of America

or the BBC. It could be that this public conflict over the future of atomic weapons might be more important in the end than the Amer-ican-Soviet talks in Geneva. Europe's present mood is more favorable to Mos-

cow than to Washington.

The European young have their grievances. The economies of their comgnevances. The economies of their com-tries are in decline, and many of the younger generation are afraid of not get-ting into universities or of not getting out of them with jobs. They are afraid of Mos-cow but bewildered by the casual nuclear rhetoric out of Washington.

And beyond this, they are terrified by the elemental power of atomic weapons, and find an outlet for their emotions in their cries for a nuclear-free Europe.

There seems to be agreement in London and in Bonn that this is not an anti-Amer-

and in Bond that this is not an anti-American movement. It may be anti-Reagan but is certainly not pro-Communist, despite Moscow's efforts to explait it.

But U.S. and other allied officials are concerned about two questions: First, what if the Soviets at Geneva offered to destroy half of their SS-20, SS-4 and SS-5 a

enough missiles left to destroy and intimi-

rope have clearly not considered the consequences of such a proposal, or of their demonstrations in general. For, obviously, if Moscow could retain enough missiles to ri Moscow could retain enough missiles to destroy Western Europe, and NATO is not able to maintain the balance of military power, the United States would not be willing to leave in Europe more than 300,000 soldiers plus their families as hostages to superior Soviet power.

There is now a Europe First mood here, as there was an America First movement in the United States before the last world war. It does not represent majority opin-ion, but it could be strong enough to paralyze European governments, as the America First movement paralyzed Washington

evidence that it is being addressed by ei-ther Reagan or the other allied leaders. 0/981, The New York Times.

The Neglected Art of Resigning Office, With Honor

WASHINGTON — From time to time people ask, "Why does no one these days resign from a government?" It has become exremely rare for a member of the Cabinet or of the highest echelon at the White House to hand in his resignation on a point of principle or even his own misconduct.

could not unite them?

The question is a good one. If one is embarrassing the president one serves, or if one is embarrassed by the president one serves, one should pick up one's pen and write, "It is with reluctance that I surrender the office to which you appointed me, but ... "There used even to be an art to resigning

and to resignation letters.

I think I am right in saying that political resignations have been rarer in America than in Britain or any other parliamentary system. The reason is that a government member in a parliamentary system is drawn not only from Parliament but from a strong party that is likely to continue to embrace him. while still supporting the prime

from Parliament or from his party, the judgment is left to the vnters in his constituency at the next election. Politicians in a parliamentary system have a political life of their own beyond their appointment to a government by a party leader.

in Britain a member of a government — or of the "shadow government" of the opposition party - sits on the front benches in Parliament. All that happens if he resigns is that he moves to the back benches. One day be is on the front bench. The next day he rises from the back benches, either to explain his conduct that has forced his resignation, or to denounce the

prime minister he has just left.

Parliament so sustains the individual political life of one of its

opposition to their party.

From the front beach below the gangway, a Churchill might flay his own party and there, indeed, as an old man he sat, sometimes slumped as he quietly dozed, after age had forced him to resign from the office of prime minister. These images — the back beaches," "the front beach below the gangway - are important. They tell of

But the member of a government in America is simply the creature of the president. Even if be was drawn from Congress, he must give up his seat. If he resigns, where does he go? To the Ford Foundation? Wherever it is that he wretchedly goes, he must leave the

of any place of significance in the political life of their country, they preemed themselves, among the jel-ly beans, in their moment of makebelieve importance.

But Must Allen's Ambushers Win?

The resigning official may leave the government, but he still sits in Parliament and has standing in his party. Except in the extremely rare when someone is expelled

Churchill

members that he may not even have to move to the back benches. If he has a particularly important standing in his party, he may move only to "the front beach below the gangway." The gangway is merely an aisle which divides the benches. It is one of the most honored places for party men who are in

a political life that is independent of a prime minister or a president.

political theater.

This is true even of those who are thrust out of government by the voters. There was something infinitely sad and telling about the three ex-presidents who traveled together on Air Farce One to the funeral of Anwar Sadat, Stripped

A parliamentary system would keep Henry Kissinger in the politi-cal theater even when out of office. But the shuttle diplomat is reduced

in America to a shuttle celebrity. experience is appalling. No other political system would have al-lowed Terry Sanford, when he ceased to be governor of North Carolina, to while away his best years as a university president.

WASHINGTON — When high White House aides conspire with Justice Department political appointees to subvert and discredit the findings of professional lawmen at the Justice Department and in the FBL that is a scandal. In the case of the national secur-

ity adviser, Richard Allen, however, the purpose of the interference from on high has not been to cover up but to besmear, Two sources one close to the president's troiks, the other in the office of the attorney general — have systematically sought to indict Allen by leak, and to disparage the director of the FBI for daring to conclude an in-vestigation without delivering the desired scalp.
What did Allen do? He helped

arrange an interview for a Japa-nese magazine with Mrs. Reagan. The reporter handed him a set of clippings of previous interviews with first ladies along with a closed envelope. In the elevator on the way back to one of his offices, he ed the envelope and saw cash. He told his secretary to turn it over to the proper authorities, whoever they were. She counted it and stuck it in a locked file cabi-net. Allen told three other people who came into his office about

It Checked

Evidently he forgot about it. Allen never had the combination to the locked file nor the key to the office. When the office changed hands, there was the money. The FBI was called in.

The lawmen checked in Iapan about the amount of money and its purpose. At the end of the investigation, the FBl and the middle-level professionals at the Depart-ment of Justice found not merely no crime, but not even an allegation of wrongdoing. They recom-mended the case be closed.

Having alerted Japan with his interviews, the FBI director, William Webster, learned that the Tokyn press was preparing to report the fact of his investigation. Properly, he went to the attorney gener-William French Smith, for anthorization to tell Allen that there would soon be publicity about him in Japan. Sure, said the autorney

general tell him. When Webster called Allen to say that the fact of the investiga-tion would soon be public. Allen asked the natural question in that situation: Did my recollection of the episode check out? Webster, his investigation finished, told the

sent, and one can usually trust to events not too far in the future to appear to justify one's action.
But one must, if one is to at-

tempt such a resignation, study one's hand. One can easily overplay it. In a famous resignation, Lord Raudolph Churchill quit at the height of his youthful career from the post of chancellor of the exchequer. There was no one, he thought, by whom he could be replaced. He would be asked back, he believed, on his own terms,

was the resignation on principle that would have electrified the na-tion? Oh, McGeorge Bundy got out early Robert McNamara, after

Lastly, there is the resignation forced not only by one's own misconduct but by the mere ap-pearance of misconduct, if it tob much embarrasses the administration. We demand very high sometimes absurdly high — standards of politicians. We hold them to account for conduct that is not mal in most businesses, even praiseworthy, and is certainly not unknown in the ivied cloisters of

But if one embarrasses a government by an offense against such standards, or even by the hint of such an offense, one should resign at whatever cost to one's reputs tion. Governments engaged in the business of life and death cannot for too long be troubled by a man of repeated poor judgment. The man should resign at once and therefore with some honor. A political resignation on grounds of one's own conduct is not an admission of guilt. It is not a moral but only a political act. It says merely that the man considers that, rightly,

to me obvious. There is no reason why David Stockman should have got out. I happen to detest his policies. But the government would be spineless without him, and all that we now know is that he has been fighting genuine political battles within the administration. It does no harm to have them in the open;

But Richard V. Allen, having once already been forced out of Reagan's campaign staff, ought now to leave. It is simply a matter of pluses and minuses. The end

Sum comes out minus. 01981, The Washington Past.

New Engines for Old 727s **May Ground Boeing Orders**

By Thomas C. Haves New York Times Service

NEW YORK - Commercial airlines' growing interest in putting new engines on aging aircraft is causing some anxious moments for the Boeing Co.

The dominant U.S. aircraft manufactur-

er is investing heavily in jetliners intended to replace the 727-200, the plane being considered for overhaul by some U.S. air-lines. But saddled with old fleets and starved for the cash, some U.S. airlines stead, United Airlines, Delta Air Lines and others have turned to "re-engining," installing quieter, more fuel-efficient engines on the McDonnell Douglas DC-8s.

By all accounts the Bosing 777, 200 By all accounts, the Boeing 727-200, the

biggest-selling commercial jet, will be the next model taken in for an overhaul Although the re-engining of old jets could bloom into a \$15-billion business for manufacturers, Boeing, for one, is not enthusiastic. The company, which makes about six of every 10 commercial airplanes sold, has designed a 130-seat, fuel-efficient 737-300 and a 175-seat 757 to substitute for the well-traveled 727.

Fear of Lost Orders

The company's fear, according to industry sources, is that every \$13 million spent by an airline retrofitting a 727 could mean the loss of an order for a \$22-million 737 or a \$28-million 757.

T.A. Wilson, Boeing's chairman and chief executive, is clearly cool to retrofitting. In a recent speech, Mr. Wilson said that "it makes no economic sense to mod-ernize" most existing passenger similanes. But, in a conversation with reporters, Mr. Wilson deflected a question about Bocing's position on retrofitting. He said. however, that demand for retrofitting was unclear and noted that only American Airlines has demonstrated interest in replacing the engines on its 727s.

Delta, for example, prefers development of a new generation of 150-seat planes for the late 1980s to extending the life of the

61s retrofitted by McDonnell Douglas, is one of the few airlines that can afford the new plane, analysts said.

Mr. Wilson indicated that Boeing also does not want to divert manpower to re-engining the 727. "Our plate is pretty full" with production of the new 767s, which seat 208 passengers, and 757s, he said. He added that the airlines' troubles have resulted in a drop in orders for the new planes this fall. "I'm not as optimistic as I was two months ago," he said.

Fall in Orders

If orders continue to dwindle, Mr. Wilson may warm up to retrofitting, industry analysts said. Boeing produced 299 planes in 1980. Wolfgang Demisch, an aerospace analyst with Morgan, Stanley & Co., expects the figure to fall to 268 this year and 203 in 1982.

"In a period of restricted funds, with orders slowing, the prospect of re-engining the 727 is pretty good," Mr. Demisch said. Boeing's new 767 and 757 models, made with bighter materials and advanced technology, boast of a fuel savings of up to 45 percent compared with the first 727s produced in the late 1960s. The first 767 will be delivered to United Airlines oext spring. Despite the 757s' big advantages in fuel economy, at about \$35 million a copy they are not expected to push the existing they are not expected to push the exist fleets of 727s into storage.

A leading planner for Boeing's commercial airplane company indicated last summer that Boeing's newest models were not so advanced that they would quickly outstrip the current fleet of 727s in productivity, that is, delivering more passen-gers to destinations at lower cost.

Expensive Replacements

Mr. Demisch noted: "The airlines aren't saving money by buying oew airplanes. The new aircraft simply cost too much to

That is one reason why American, which counts 125 727s among its passenger fleet of 221 airplanes, is seriously looking at retrolitting. It has 83 727-200s.

About 950 727-200s have been built since 1971. These planes were constructed with a new metal alloy and assembly pro-

200s since delivery. American is considering either the Pratt & Whitney 2037 engine, which it has specified for its 15 757s, or the RV 211-535E, made by Rolls-

Royce.
Both versions match the 37,000 pounds of thrust on today's 727-200s, while consuming about 30 percent less fuel. That is crucial for the airlines. The price of jet fuel has risen to more than \$1 a gallon this year from an average of 27% cents in 1976. At American, fuel costs were 29 percent of the total operating budget last year, com-pared with 16 percent in 1976.

A transformed 727 could be in operation by 1985, if Boeing and American go ahead with the project next year. The plane also would be "stretched" by five feet, allowing American to add two rows, or 12 seats, for a new passenger capacity

ienation and loneliness, marital or family problems stemming from the separation and a host of stress-related illnesses ranging from ulcers and colitis to heart disease. In corporations, human-resource managers say there may be a greater incidence of alcoholism among businessmen whose jobs require extensive travel than among the office-bound, although proof is lacking.

Indeed, there are few studies of the effects of prolonged travel on businessmen. And corporations, which have in the last decade devoted a great deal of energy to employee relations, appear to be skipping over this particular aspect of corporate life. "It is so important to the lives of many executives, it's surprising that nobody has done any research, corporatewide or of an academic nature," said Marilyn Morgan, assistant professor of management at the Wharton School.

It is also difficult to determine just how many miles are logged by businessmen each year, or what percentage of executives spend their time away from home on business.

Heidrick & Struggles Inc., an executive re-cruiting firm, polled the chief international officers of 250 major corporations last year and calculated that the average international officer took 10 overseas tops a year, averag-ing to 114,500 miles per executive. The rest of the available data is generally called from company expense reports. For instance, at the Sun Co., a diversified energy concern, some 6,000 employees traveled a total of 60 million miles last year and spent 120,000

nights in hotels. Despite such movement by businessme few companies have enacted programs aimed at either reducing the need for travel or preventing problems that travel causes. Some ues make it a poli the burden of travel At Laventhol & Horwath, a national accounting firm with headquarters in Philadelphia, employees who are away from home for more than a week can on a case-by-case basis fly home for the weekend, or even make it a four-day

W. German Steel Firms **Uniting to Forge Profit**

By John Tagliabue New York Times Service

BONN - In the West German steel industry, history seems to be trying to repeat itself.

In 1926 several of Germany's biggest steelmakers, hard-pressed by the collapse of the German economy after World War I, band-ed together in a cartel. It survived until the Allies dismembered it after World War II.

Now West Germany's steelmakers — among the most profitable in Europe until the mid-1970s are losing money. To stop the slide, the country's No. 2 and No. 3 steel producers have obtained Bonn's blessing to explore ways of combining their operations. A new

steelmaking giant may result.
"We're in a vicious circle of underespacity, high costs, low prices and, as a result, enormous losses," Detlef Rohwedder, chairman of Estel Hoeseh, the second largest steel firm, recently told an assembly of labor leaders.

The basic idea is for the unprofitable steelmaking division of Friedrich Krupp Huttenwerke, the No. 3 producer, to provide Hoesch with a cheap domestic source of steel for its profitable processing and manufacturing activity.

The West German government, which has promised financial help for the proposed combination, has also asked the companies to exam-ine the feasibility of bringing in a third partner, the steelmaking arm the state-owned company,

Salzgitter.
There's a good possibility we'll be working together formally, le-gally and practically as of Jan I, 1982," Mr. Rohwedder said.

Labor leaders have expressed doubt that combining losers can make a winner. At a recent meeting of metal workers in Dorumind, proposal was assailed as a "marriage of elephants" by union officials. They fear a further loss of

"Size alone is not a concept," said Rudolf Judith, the steel industry expert at I.G. Metall, the metal workers' union.

would have far-reaching effects on Europe's steel industry. The new group would produce roughly 12 million metric tons of steel a year, making it Europe's second-largest steel producer. The largest is West Germany's Thyssen, which last year turned out 13.15 million

And the new arrangement would mean the breakup of Estel a combination of Hoeseb and Koninklijke Nederlandsche Hoogovens en Staalfabrieken. This Dutch-German group was considered one of Europe's most promising transnational steel enterprises when it was formed in 1972. Its dissolution would have unpredictadustry of the Netherlands.

Hoesch linked up with the Dutch company so that the big Hoogovens steel plant at ljmniden in the oorthern part of the Netherlands could supply Hoesch's steelprocessing unit at Dortmund, in the heart of the Ruhr, with steel less costly than Hoesch itself could

With the steel industry in decline, however, Hoesch took less than half the planned I million tons a year, and the German commounting losses made Dutch labor unions restless. Estel's executive committee has begun to consider breaking up the joint opcration. Next mooth Otto Lambsdorff, the West German finance minister, is scheduled to meet his Dutch counterpart, Jan Terlouw, to discuss details of a "divorce."

West Germany long beld up its steel industry as a model for the rest of Europe. Sensing deep shifts in the industry, however, the big West German steel producers began diversifying in the 1970s into such areas as machine production and plant construction. With a (Continued on Page 9, Col. 2)

the biggest export money-makers for the United States, accounting for 42 percent of the loans granted by the U.S. Export-Import Bank. Mr. Baldrige told Mr. Stockman he could not subscribe to the elimination of any of these three offices. Besides, Mr. Baldrige said, the

U.S. Officials Feud **Over Export Units**

By Thomas O'Toole Washington Post Service

WASHINGTON - Budget Director David Stockman and Com-merce Secretary Malcolm Baldrige are involved in a behind-the-scenes battle over an attempt to climinate three Commerce Department of-fices that promote the export of U.S.-made goods, particularly aircraft and ouclear power plants.

These services are oot like an rector set that one can fool around with on the living-room floor and quickly build up again."

Mr. Baldrige told Mr. Stockman on Nov. 17 in an angry memo.

"After 30 years of international business experience, I understand what the consequences of such ac-tions would be and there is no way I can go along with the recommen

'Very Useful Source'

In a Nov. 12 memo, the budget director said be wanted Mr. Bal-drige to eliminate the Commerce Department's Office of Export Development, the Bureau of Industrial Economics and the Foreign Commercial Service. The three employ 1.190 people, including 600 in the Foreign Commercial Service who perform economic intelligence in U.S. embassies for American

"The Foreign Commercial Service is consistently a very useful source of information and assistance to the American business community," a Washington repre-sentative of a major U.S. corpora-tion said. "If Brazil was making plans to build a subway in Rio de Janeiro, the Commercial Service would inform the American subway industry of such plans."

The memo to Mr. Stockman

makes clear that the Commerce Secretary was angry from the out-

set.
"You sent your memorandum
over on Thursday, giving us the
weekend to reply to extremely farreaching recommendations," Mr. Baldrige starts ont, "and leaving us with the impression that they were perfunctory at best.

"When the president asked me to take this job," Mr. Baldrige goes on, "we agreed that the depart-ment bad to be strengthened in the areas of trade and economic affairs. Our conversations then and since have not implied either the status quo or weakening in these

Previous Cuts Cited

Of the other branches Mr. Stockman wanted to eliminate, the Bureau of Industrial Economics analyzes export trends and the Office of Export Development helps to promote the export of U.S.-built technological goods such as aircraft and ouclear-power plants. Along with farm products, foreign purchases of aircraft and ouclear power plants are two of

Commerce Department had already absorbed what he said were the deepest budget cuts of any de-partment in the federal govern-

"We have already agreed to cuts that will take the Commerce Department 48 percent below the Carter 1982 budget," Mr. Baldrige said. "Our revised 1984 budget is 38 percent lower than the 1981 level even after rescissions and de-ferrals were applied. This is more than any other Cabinet depart-

ment has done.
"With regard to the remainder of your recommendations, I protest in the strongest terms most of the cuts below our revised request. These recommended levels are

Rise in Debt Of East Bloc Cited in Study

GENEVA — Eastern Europe may owe more than \$80 billion to Western countries and Japan by the end of 1981, the United Na-

Europe said Sunday.

The debt, most of it incurred by East European countries other than the Soviet Union, is estimated to have risen from \$64 billion in 1979 and \$73 billion last year, the commission said in a review of East-West trade.

The commission, which pro-motes trade and an exchange of economic information between Europe, the United States and Canada, said the pattern of East-West trade had changed since the early 1970s, with Eastern Europe importing more food and export-ing more oil and natural gas.

Fewer Loans

It said East Enropean state enterprises appeared to have taken out fewer new loans in 1981 when record interest rates in many Western countries added to their debt burden, leading them to draw from their foreign exchange reserves in-

The report made oo mention of individual countries' debts our of recent moves by Poland's western creditors to restructure its debts estimated now at \$25.7 billion.

It said the Eastern European countries had managed to break out of their post-war austerity pe od through loans, gold sales and improved terms of trade. The commission said periods when they took out fewer loans were often associated with an increase in gold sales, mostly by the Soviet Union.

Western agricultural exports to the Soviet Union rose from 14.3 percent of total exports in 1971-75 to 18 percent last year while to other Eastern bloc countries they went up from 9.4 percent to 16 percent over the same period. Oil, natural gas and other ener-

gy imported by the West rose from 43 percent of all imports to 66 percent last year.

Japanese Posted **October Surplus** Of \$1.78 Billion

From Agency Dispatche

.TOKYO - Japan posted up a \$1.78-billion corrent-account surplus in October, bringing the accumulated figure for the first seven months of its fiscal year to \$6.6 biltion, or close to what had been es-timated for the whole year.

The Finance Ministry said Sat-usday that preliminary figures showed the April-October total almost made up the entire estimated surplus of \$7 billion for the fiscal year that ends next March.

Finance Ministry officials said that although the October surplus was down from \$2.12 billion in September, it was in sharp contrast with the \$17-million deficit a year ago. They attributed the surplus to brisk exports and a drastic drop in oil imports.

October's balance of payments, which includes current account as well as long and short-term capital accounts, showed a \$1.45-billion deficit compared with the \$1.56billion surplus in September.

After seasonal adjustments, the current-account surplus amounted to \$1.5 billion and the overall pay-ments deficit was \$1.73 billion, the

fficials said. The trade imbalance is causing serious friction between Japan and

its major trading partners.
U.S. Treasury Secretary Donald Regan said during a visit to Japan this month that the Japanese ought to act quickly to reduce the huge of endless late-night flights and countless hotel rooms cannot be tailored to individuals. Moreover, some people travel easier than others. There are people who enjoy traveling for work and have ac-commodated their lives and families to it," said Dr. Bruce Karrh, medical director for E.I. du Pont de Nemours & Co.

But for others, the lack of comfort and the stress and inconvenience of life on the road are all sources of psychological problems. "The executive who travels, by def-inition, does not have a stable sup-port system. That is to say, family, friends and colleagues are not available to him. He is constantly mixing with strangers in strange environments," said Mel Goldsmith, director of clinical ser-

referrals by corporations, says of the traveling businessmen: They are frequently beset with loneliness and the absence of intimacy in their lives."

Mr. Goldsmith said separation from one's family often causes marital or family problems, such as those alluded to by the market-ing manager from Cleveland. In addition, there are the difficulties that develop in single-parent households. "In the absence of her spouse, the wife is left to her own devices," Goldsmith said. "That could lead to alcoholism, ex-tramarital affairs, depression."

A wife who has assumed the function of family leader in her husband's absence may be unwilling to relinquish that role once the band is settled in a homebound vices at Acorn, a psychological services center owned by the INA Corp. Mr. Goldsmith, whose cii-"He wants to come back as

West German Steelmakers **Uniting in Search for Profit**

plummeting steel prices, caused by continued overcapacity while costs are rising and recession is slowing demand, have dimin-ished profits. Most of the country's eight major steelmakers are in the

Both Hoesch and Krupp annonneed plans earlier this year to curtail sized production, cutting about 12,000 jobs, to reduce costs and return to profitability. Krupp sought government credit guaran-tees totaling \$116 million to achieve its sim, and Mr. Rohwedder told Bonn officials that Hoesch would need between \$1.7 billion and \$2 billion from 1982 to 1987 to solve its problems.

The government, troubled by rising unemployment in the Ruhr, where two-thirds of the West German steel industry is situated, offered measures to cut capacity and modernize and told the two companies to start discussing combining their operations.

Things became complicated when news of the negotiations reached Ernst Pieper, chairman of Salzgitter, the state-owned enterprise. Its steelmaking division, Peine-Salzgitter, West Germany's fifth-largest steel producer, lost \$13.8 million last year, and it expects a \$90 million loss this year. Mr. Pieper was eager to bring

his company into the talks. Despite the resistance of Hoesch, Krupp and Mr. Lambsdorff, Hans' Matthofer, the official who has to write off Salzgitter's losses, agreed.

One of Chancellor Helmnt Schmidt's high-ranking aides, re-questing anonymity, said the course Mr. Schmidt leans toward is a combination of Hoesch and Krupp operations, with some form of government stake and a Salzgitter entry at a later date.

But skepticism remains. Ulrich Steger, a member of Parliament from the Ruhr, recently voiced concern that Hoesch and Krupp might cling to their profitable op-erations and dump the losers onto Bonn. Mr. Steger also said money to finance the combination might be hard to provide at a time when the government is talking of anst-

\$700 million a year. The annual inflation rate is estimated at minimum of 50 percent by Western

the urging of the International The Sudan's cotton crop, long Monetary Fund and other major donors from the West and the Arab world, President Gasfar al-Nimeiry has undertaken a program of sweeping fiscal change meant to rehabilitate the Sudan's deteriorating economy. The program includes a devaluation of the Sudanese pound and an end to vernment subsidies for cooking oil, wheat and sugar.

The measures carry political risks for the 51-year-old president, whose personal position appears somewhat uncertain, according to senior diplomats in the U.S., French and British embassies here.

By Pranay Gupte

New York Times Service

KHARTOUM, The Sudan - At

But, these diplomats said, Mr. Nimeiry had little choice in the matter - the IMF had insisted on far-reaching change by the Sudan government in return for granting it an emergency loan of \$237 mil-

The Sudan — the largest country in area in Africa, with a population of 20 million overwhelmingly poor people - needs that loan urgently to overcome immediate balance-of-payments problems.

Faihre to Comply

The money was allotted under a The money was allotted under a previous understanding with the monetary fund, Western economists here said, but the Nimeiry government failed to comply with such IMF conditions as trimming the budget and cutting back on imports. As a result, the fund held back its neurostat. The fund held back its payments. The fund has come under pressure from the Reagan administration to tighten up its lending practices.

President Nimery's economic

changes are being accompanied by an overhaul of his administration. In announcing his new program, the president severely criticized his Cabinet for what he characterized as "inept economie performance." Key Cabinet portfolios are being switched around, he said, and the changes will be disclosed "soon."

In his "18-point economic recovery program," the president said, the Sudanese pound — equivalent to roughly \$1.26 — was being devalued by 12.5 percent. In addition, he said, there would be a 40percent increase in taxes on oil, a 10-percent rise in taxes on imports, an immediate end to the subsidies for cooking oil and a gradual phas-ing out of wheat and sugar subsi-dies. Mr. Nimeiry said that those subsidies cost the government about \$800 million a year.

50% Inflation Estimate

After years of glossing over the country's economic crisis, Sudanese officials are at last starting to acknowledge it, Western economists said. According to the mone-tary fund, the Sudan is now the world's 17th-poorest country, de-spite substantial agricultural and mineral potential, and its overall foreign debt is \$3 billion.

Part of that debt is at least \$450 million that the Sudan owes to Western banks in arrears. Because of its failure to keep up adequately with debt servicing, the country now finds itself unable to find new, large commercial credits, according to U.S. and British bank-

ing Libya is sponsoring subversion in the Sudan aimed at toppling the government.

the mainstay of its primarily agricultural economy, last year brought in barely \$150 million, largely because of poor production methods and mismanagement, Total imports climbed 25 percent last year, to \$1.7 billion, while exports sagged 3.3 percent, to \$500 million—almost all of which went toward oil payments to Saudi Arabia and

President Nimeiry said in a recent interview that he expected the Sudan to approach "self-sufficien-cy" in oil production toward the latter part of the decade. The country now imports 40,000 bar-rels a day from Saudi Arabia and Kuwait. But, the President said, new oil discoveries in Kordofan and the Upper Nile region and near Darfur indicated that the Sudan might be able to produce at least 25,000 barrels a day by 1985.

Since the late 1970's, Chevron Oil Co. has reportedly spent more than \$300 million for oil explora-tion in the Sudan. According to U.S. officials here, Chevron representatives hope that the Sudan's oil production will reach 200,000 barrels a day within 10 years.

A measure of the confidence Sudanese officials have in such opti-mism is the new refinery that Mr. Nimeiry has ordered built in Kosti. Current plans call for a daily production of 25,000 barrels of respending more than \$1 billion on the Kosti refinery, and there is also talk of spending \$2 billion more on a pipeline to Port Sudan, apparently in the expectation that the country will be able to export oil by the

Expectations

Traveling on Business Can Take Large Toll

(Continued from Page 9) they team to create a new relationship for themselves or the marraige ends," said Mr. Goldsmith. The Cleveland executive said:

"You come home and you're not the authority figure. You have to re-establish yourself as head of the household — or at least as an Corporations in general equal partner."

Another person at the bar, a systems analyst from upstate New York who was on business in Philadelphia, said: "The major thing is the loneliness. Given my personali-ty. I usually don't strike up a con-versation with just anybody and I do drink more when I'm on the

Experts on alcoholism, such as John Williams, head of the employee alcoholism program at the Morgan Guaranty Trust Co., said that people with drinking prob-lems who had career options and mobility would gravitate toward jobs that require travel. He and others believe there is a higher rate of alcoholism among people who travel extensively for their jobs

than there is among nontravelers. the man of the house. She doesn't although there are no statistics to want to give up the role. Either confirm this view. Travel affords the drinker not only the freedom to drink, but the freedom to have a hangover in private. And the distance traveler gets the opportunity to imbibe, with free drinks in "business class" flights and at

> Corporations in general do not appear to be trying to change the social climate under which business is typically conducted on the road. Also, companies typically do not "screen" potential travel candidates for drinking babits. So until a drinking problem damages a person's job performance, there is little a company has reason to do.
> "As soon as the alcoholism affects the performance, something has to be done," Mr. Goldsmith said. "The employee is either fired or re-

ferred to a treatment program." Assuming the worker successful-ly completes a detoxification program at a rehabilitation center, should be continue a job that requires extensive travel? "If he feels he can handle it," Mr. Goldsmith

said. "If he travels to places where

he knows a lot of people. He can go to Alcoholics Anonymous in those cities. Sometimes the company and the individual have to make a decision that the job is so conducive to drinking he must be put in a job in the home office. Also, at home there is a support structure."

For the businessman who dislikes traveling, telling an employer he "travels poorly" may be the equivalent to cutting his professional throat. "I've dealt with maybe 40 or 50 companies and the basic underlying principles of most companies is that if you can't stand the leat get out of the kitch-ca," said Peter Brill, a psychiatrist who heads the Center for the Study of Adult Development, an alfiliation of the University of Pennsylvania. "So if for any reason a person cannot cope with a job or does not want to cope, by and large that is the end of his pro-

Dr. Karth of Du Pont, who said he did oot detect "any umusual amount of drinking problems, stress problems, or family prob-lems in people who travel exten-

motions."

sively," said that Du Pont would not require anyone who did not travel to stay in the job. He and others in large corporations con-tend that the decision would have little ultimate effect on a person's career. That point is contradicted by Ross Webber, professor of management at the Wharton School, who said, "It probably does mean you are off the fast track."

Webber said a person who does not travel well should not consider himself a loser. Instead, the person should — as early in his career as possible — "seek out a company whose culture better suits his personality."

Pilot Survives Crash, Swim United Press Intern

HILTON HEAD ISLAND, S.C. — A pilot swam for more than seven hours to reach shore after her hight plane crashed in the Atlantic. Kathy Maready, 22, a flying in-structor, was returning to Hilton Head Island from Lady Island when her plane went down Thurs-day night in Port Royal Sound.

Grideria (Septimental)
Hospital (Septimental)

New, even 1 ounce, 1/2 ounce and 1/4 ounce coins.

Announcing three even better ways to own The Gold Coins of Mexico.

If you've been waiting for the perfect time to buy gold. this is the gold you've been waiting for: The Gold Coins of Mexico in perfect, even-weight sizes.

These are annually-dated coins, minted in unlimited quantities for people who want to own gold in convenient, ounce-related sizes. They're legal lender and also have a unique liquidity. For they're supported by the central bank of Mexico, Banco de Mexico, which guarantees full redemption at a price based on the current market value of gold.

And since they contain precisely one, 1/2 and 1/4 troy ounces of pure gold, you can now invest precisely what you want to in gold. Which means, if you customarily buy one-ounce coins, or keep your gold in even-weight lots, you now have a perfect opportunity to diversify your gold holdings with our 1 oz. coin. Or, if you prefer to invest little by little, you can choose from our smaller and more affordable 1/2 oz. and 1/4 oz. coins.

Due to their even weights, it's even easier for you to determine their value by checking the gold ounce

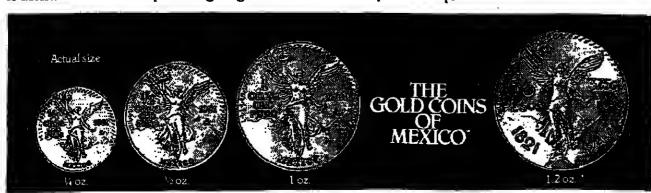

price in your daily newspaper.

And, because they're part of the world's best-selling series of gold bullion coins-over 75,000,000 sold worldwide-and minted for Mexico's Federal Reserve Bank, Banco de Mexico, they enjoy a long tradition of international acceptability and liquidity. So you'll find them easy to trade wherever you go.

What's more, if you're looking for high liquidity and high gold content in a coin, you'll find them both in our 50-Peso gold piece. With more than 1.2 troy ozs. of pure gold and over 17,000,000 purchased worldwide. it's one of the world's largest and most popular gold bullion coins.

As with our 50-Peso gold piece, our 1 oz., ½ oz. and 1/4 oz. coins are easy to buy and resell around the world or around the corner. So you needn't ever look far to find precisely what you want in gold.

And you needn't wait. Because The Gold Coins of Mexico are here—and everywhere—in precisely the sizes you've always wanted.

The Gold Coins of Mexico are available wherever gold bullion coins are sold. Write for a free brochure to: The Gold Coins of Mexico, P.O. Box 1812, New York, N.Y. 10163 U.S.A. We are pleased to announce that the

Honorable Henry A. Kissinger

has been elected a Director

Socialists Discuss

EEC Enlargement

MADRID — Socialist leaders from 12 European countries have ended a two-day meeting on the prospective enlargement of the European Economic Community, respective.

solving little but expressing will-ingness to negotiate the eventual entry of Spain and Portugal.

Felipe González, the Spanish Socialist leader, said it was ironie

that the EEC constantly expressed

solidarity with poor countries of the southern hemisphere but was

unable to show its solidarity with south European countries by ad-

mitting them into the community.

The secretary-general of the French Socialist Party. Liooel Jos-pin, said that France was eager to include Spain and Portugal in the

community but that serious negoti-

ations were required on issues of

was that he could out cope with the pressures around him. Johnsoo says he is fine oow. "I'm not nervous about anything.

pleased with the results." In Satur-

day's 98-90 loss to Bostoo - the

Hawks' first defeat in five games Johnson contributed 15 points.
 But, Kasten added, Johnson's behavior is still "monitored very

"Eddie's situation isn't a com-

mon problem at all," said Kasien, who is close to Johnson. There

are a lot of complex things here. Eddie is a terrific kid, extremely intelligent and articulate. He's just

ATLANTA — He was shooting free throws hy himself after practice, just as he has most for of his My friends and people involved are the ones who are oervous. I athletic life. It was a ritual that know I'm going to be OK, I am once helped him become an all-star in the National Basketball As-Johnson resumed playing on schedule, and General Manager Stan Kasten said he is "very

sociation. But that day early last month, the police came for Atlanta Hawks guard Eddie Johnson, He resisted. He kicked and he fought, but the officers — with papers signed by two psychiatrists ordering Johnson temporarily committed — took him to the psychiatrie ward of Atlanta's Grady Memorial Hospital.

By David DuPree

Washington Post Service

Last seasoo his Atlanta Hawk teaumates selected the 26-year-old Johnson the team's most valuable player — despite an off-season incident in which he was arrested on drug charges that later were dropped.

Tumbling Down

intelligent and articulare. He's just had some problems. We feel it's worth it to stick with him and see him through all of this if at all possible...."

But Johnson isn't completely convinced of the Hawks' motives.

"I'm concerned about myself as a nection, and then're concerned. This year he was expected to run the Hawks' offense for oew Coach Kevin Loughery, who says John-son "is as good as any guard in the league." Instead, everything came tumhling down.

At the direction of his own psy-"I'm concerned about myself as a person, and they're concerned about me only because of how I reflect on the team," he said.

Johnson, from Auburn, was picked by Atlanta in the third round of the 1977 draft and bas been a star since. In 1979-80, he averaged 18.5 points and 4.7 assists, and as an all-star game starter scored 22 points and had 7 assists.

chiatrist, in consultation with an-other doctor, Johnson spent a week in the hospital for a manicdepressive disorder, the type generally considered to reflect a hiochemical imbalance in the brain. The manic phase involves severe mood swings characterized by excessive elation, irritability and talkativeness.

When Johnson was released from the hospital, his psychiatrist, Dr. Lloyd Baccus, and the Hawks felt he was not ready to join the team for the start of the season, and Johnson was suspended.

At one recent home game, Johnson sat in the stands as Atlanta. struggling with a 3-4 record, was defeated by the Detroit Pistons. As he watched Isiah Thomas and John Long run around the Hawk guards, Johnson, who was to resume practice with the team three days later, talked about the problems that led to his committal and how he has attempted to deal with

He characterizes himself as "a bit arrogant, a touch cocky and more than a bit vulnerable, but still only human." What brought about his recent problems, he says,

Golfer Bert Yancey spent time in 11 hospitals before being diag-

sists.

The 1980-81 season was John-soo's best. He averaged a career-high 19.1 points and 5.3 assists while shooting 50 percent from the But before last season started,

Johnson was arrested and charged with driving under the influence of drugs, possession of cocaine and driving without a license.

"I'm a country boy, and all of a sudden I was in the big city making it in the big time," he said.
"And I ran into a lot of leedes." And I ran into a lot of leeches

and snakes. I went around with the

wrong people - it caught up with At the time of his arrest, the Hawks agreed to seek psychiatric help for him, and the drug and driving charges eventually were dropped. Johnsoo was diagnosed as a manic depressive and put on lithium, a medication to control the coodition.

Uoder medicatioo, maoic depressives can lead oormal lives.

Baccus' care and, according to the Hawks, be has resumed his medinosed as a manic depressive several years ago. He oow operates a golf school in Hilton Head, S.C., and rejoined the PGA tour this cation. Even though he has only just begun to play again competitively, Johnson is confident. "This is my livelihood," he said. "I know how

Unexplained

But for reasons no one - even Johnson — can explaio, be stopped taking his medication during the past offseason. Kasten said be "could see a gradual change in

his behavior over the summer.

At the team's first practice this year, according to Kasten, Johnson exhibited disruptive behavior. After meeting with Kasten, John-son and team president Michael Gearon, Baccus drew up the pa-pers to have Johnson temporarily committed, (Under Georgia law, a person may be involuntarily committed for a week by two psychiatrists. Longer committals must be ordered by the courts.)

struction of a chemical building complex comprising the following production unine; sulfuric acid, phosphoric acid and fertilizer, together with the construction of hurbor installations.

For the construction of these harbor installations, object of the present preselec-tion notice, the INDUSTRIES CHIMIQUES DU SENEGAL have obtained mainly composed of the following elements:

- Truck-unloading, storage, recoperation and ship-loading of fertilizer:

Contractors interested in this tender offer may obtain their preselection files from December 18, 1981 from the following offices:

66 Boulevard de la République, DAKAR - SENEGAL Tel: 21.99.60. - INDUSTRIES CHIMIQUES DU SÉNÉGAL,

The preselection files must be returned to the same offices before January 10, 1982. The tender offer will take place from January 20, 1982.

New Zealand midfielder Keith MacKay was tackled from

behind by Saudi Arabia's Hashim Sroor Mubarak during the early going in Saturday's World Cup qualifying soccer match in Auckland. The Saudis held the home side to a surprising 2-2 draw, dimming New Zealand's hopes of reaching next summer's final. New Zealand has four points and two games left to play in the Asia/Oceania group. Saudi Arabia gained its first point of the competition.

THE GATE OF HEAVENLY PEACE The Chinese and Their Revolution

By Jonathan D. Spence. pp. 465. \$19.95 Viking Press, 625 Madison Avenue, New York 10022.

Reviewed by Jay Mathews

SCHOLARS who dable in modern Chinese literature sometimes wonder why so little of it is any good. This marvelous book suggests one answer: Chinese writers may be so ob-sessed with China, so wrapped up in the question of how it can return to its former greatness, that they have no

time for subtler thought.

No one has quite done Chinese history like this before. Western readers usually pass the subject by, put off by the strange customs and philosophic assumptions and also, I think, by the nearly uppronouncable names.

Spence begins with the story of Kang Youwei, a bright and ambitious young man from Canton so floored by his first visit to Hong Kong—"the clegance of the huildings of the foreigners, the cleanliness of the streets, the officers with the resident. the efficiency of their police"—that he determines to get the best of the West for China. Through incredible persis-

Solution to Friday's Puzzle

TERRORDAER LE MANIE

with the young emperor and then be-comes a palace nag, assuming every-one sees as clearly as he does the need for western schools and western arms. Gradually we meet the younger, more radical men and women who know Kang but follow different paths to the revolution. Lu Xun, the acerbic mag-ter of short stories and political ex-says, takes us through the worst our-moil of the 1920s and 1930s. Drig Ling, a Hunanese who is probably the greatest Chioese female writer of the century, is both seduced and aban-doned by the Maoist revolution. Ding still lives in Peking. She plays the part of grande dame in Peking and does what she can to loosen the bonds of 30 years of literary oppression, but she has oot much fight left.

From Kang Youwei to the young democracy movement writers of the late 1970s run umbroken strings of authoritarian thought and ancient history which Spence entwines in intrigu-ing ways. He finds the editors of the "April Fifth Forum" in 1979 chastis-ing the Communist Party for sup-pressing news of a dissideot's trial. just as the Qing dynasty did with the trial of the revolutionary Zou Rong in

Spence's triumph is that he has illuminated the vital connections of friendship and family which have made Chinese history in this century, making them shine like a spider's web flecked with dew.

Jay Mathews is on the stoff of The Washington Post

By Robert Byrne

CHESS

OGNJEN CVITAN of Yugoslavia captured the World Jumor Championship in Mexico City with a 10½-2½ score in a Swiss-system yield of 46 players, none of whom would have had his 20th birthday until after

the tournament.

Jan Ehlvest of the Soviet Union was second with 10-3 and Nigel Short of England was third with 9-4. Jay Whitehead, the United States

junior champion, started with 4 points out of five games but then collapsed, losing his oext five in a row. Cvitan began by losing to 14-yearold Simen Agdestein of Norway, but

he lost only one other game — to Ehlvest — while winning 10. As belits youth, he played a boundlessly energetic game, sacrificing at every oppor-tunity. His sixth-round encounter with Short, an international master, was typical of his gung-bo approach. The unprepossessing 4 P-QR3 uses a tempo to develop a knight at QB3

without allowing a pin by . . . B-N5. One of White's objectives is to transpose Into a kind of Queen's Gambit Declined exchange variation after 4 . . . B-N2; 5 N-B3, P-Q4; 6 PxP; 7
B-B4. Black is permitted the alternative recapture with 6 . . . NxP, after which 7 P-K3, B-K2; 8 B-N5ch, P-QB3; 9 B-Q3 gives White a chance to produce a strong center with 10 P-K4. These schemes are the idea of Tigran Petrosian of the Soviet Union, a former world champion, and they have a wide following nowadays.

Short chose to transpose into a type of Benoni formation with 4. P-B4: 5 P-Q5, with the point that 4 P-QR3 would have no role in the pro-ceedings and would thus be a lost After 7 PxP, the white QP was, of

course, inviolable — 7 . . . NxP?; 8 Q-K4ch costs Black a piece — bot af-ter 7 . . . B-NZ, White is forced to yield a pawn. Thus, on 8 P-K4 (8 N-B3, NxPl; 9 Q-K4ch, Q-K2 is a failure for White), Q-K2, White is obliged to try a gambit.

try a gambit.

Cvitan offered a second pawn with
12 N-Q5!, the tactical point being that
12 ... NxN; 13 PxN, BxP; 14 B-K4.
B-B3; 15 B-N5, B-K2 (15 ... P-B3?;
16 B-N6ch!, PxB; 17 QxPch, K-K2;
18 KR-K1ch, K-Q3; 19 B-B4ch, K-Q4; 20 Q-K4mate); 16 KR-K1. P-B3;
17 BxRP, BxN (17 ... PxB; 18 N-K5!, Q-B2; 19 Q-N6ch, K-Q1; 20 N-B7ch, K-B1; 21 RxB! is bopeless for Black); 18 B-N6ch, K-B1; 19 Q-N3, P-Q4; 20 QxB yields White an enduring attack against the hemmed-in black king.

Position after 21 . . . K-B1

After 14 P-B4, Short should bave developed with 14 . . . B-K2 instead . of opening the KB file for his opponent with 14 . . . NxN?!; 15 PxN.

On 16 Q-K2. Short decided against 16 . . . 0-0, probably because 17 Q-R5, P-B3; 18 PxP, BxP, 19 P-K5, P-N3; 20 BxP, PxB; 21 QxPch, B-N2; 22 N-B6ch, RxN; 23 PxR would have given Cvitan a winning attack. However, it is oot clear how White could have broken through the superior defense with 17 . . . P-N3; 18 Q-R6, P-B3; 19 PxP, BxP.

Short's 16 . . . P-KR3?; 17 Q-R5. R-KBl was a weak defense that could have been defeated quietly by 19 P-QN4, 19 R-R2 and 20 R/2-KB2. But Cvitan, dreaming of glorious deeds, shot 18 BxP?, PxB; 19 RxP, RxR; 20 R-KB1, N-N4; 21 B-B4, which should have failed against 21 . . . Q-N1!; 22 N-B7ch, K-Q1!

After Short missed this winning defense and played 21 . . . K-B1?, Cvitan discovered the crushing 22 RxRch! NxR; 23 N-Bo! Short saw that 23 ... N-N4 (or any other knight move) would allow 24 QxPmate and that 23 . . . P-Q4; 24 PxPe.p. changes nothing. He therefore obliged to give up.

Having fumbled a second-period snap, Pitt quarterback Dan Marino sat dazed while Penn State's Greg Gattnso recovered the ball and picked up a few yards. Penn State won going away, 48-14.

Page 15 Penn State Storms Back to Upset Pittsburgh, 48-14

From Agency Dispatcher
PITTSBURGH — With Todd
Blackledge upstaging Dan Marino
at quarterback, Penn State stunned
top-rated and previously undefeated Pittsburgh Saturday with a 48-

4 comeback victory. Meanwhile, Paul (Bear) Bryant became the winningest coach in college football history as Ala-bama overcame four fumbles and an interception to defeat Auburn,

Pittsburgh's loss - ending its 17-game winning streak over two seasons - left No. 2 ranked Clemson as the only undereated and un-tied major college team. The Tigers did not play during the weekend.

It'll Always Be There

"I think we gave it our best," said Pittsburgh limebacker Sal Sunseri. "I still think this is a great football team. What are we, 10-1? They were saying we'd be 8-3. But this game will always be there oo matter how old I get."

Blackledge finished the game

with 12 completions in 23 attempts for 262 yards. Marino had 22 completions in 45 attempts for 267 yards, but only 80 yards in the sec-The Panthers opened as if they

would run over Penn State, scoring the first two times they had the ball as Marino hit Dwight Collins for touchdown passes covering 28 yards and 9 yards.

By the end of the first quarter Pittsburgh was leading, 14-0, and had held Penn State to minus-1

ledge took advantage of Pitt mis-takes — turnovers and penalties — Blackledge drove Penn State down to turn the game around in the sec-

ond quarter.
With the Panthers on the Penn. State 31 and driving again, Marino threw a long pass for Collins in the end zone, but Penn State intercepted. The Nittany Lions, helped by two penalties, then drove 80 yards in 10 plays for their first TD, a 2-yard run by fullback Mike Meade. Marino got his team in close again, but again Penn State inter-

tions with his hound's tooth hat, assigning a policeman to carry the lid to safety.

of his Alabama players who beat Auburn with two fourth-quarter

touchdowns Saturday, "this is one of the greatest victories I've

It was number 315. Harry

Truman was president when Bryant began winning. Amos Alonzo Stagg won 314 in 56 sea-sons. Bear's done it in 37.

He's done it by cheating (self-

confessed), by brutalizing players (59 of 96 would-be Aggies quit before Bear's first game as Texas A&M's coach), by creat-

ever been connected with."

But make no mistake: Paul (Bear) Bryant loved this one like he am't loved one for a long time. "For them to turn it around that way." Bryant said

touchdown on a 7-yard quarterback draw.

By the end of the half, Pitt had take the lead, 21-14. lost 80 yards on 9 penalties, 70 of those yards on 7 second-quarter penalties. And the Panthers lost another scoring opportunity on a fumble at the Nittany Lions' 16 with 17 second left before half-

Pitt took the second-half kickoff

Blackledge then hit Kenny Jackson with a 42-yard touchdown pass to

The next time Penn State got the ball, Blackledge hit Jackson with a 45-yard scoving pass. Brian Franco followed with field goals of 39 and 3g yards and Sean Farrell, an offensive guard, recovered a fumble by teammate Curt Warner in the

winner of the Lambert Tropby Sunday as the top major-college football team in the Northeast. The 9-2 Nittany Lions received 69 out of a possible 70 points in voting by a panel of seven sports writers and broadcasters.

Pitt (10-1), had been ranked first in the previous two weekly Lambert ballots, but finished with 62 points in the final voting.

Alabama 28, Albura 17

In Birmingham, Ala., it looked for a while as if Bryant might have to wait until 1982 to register his 315th career victory, breaking the 314-win mark of Amos Alonzo Stage. Alabama lost four fumbles and an interception and was trailing, 17-14, after Auburn's Al Del Greco kicked a 19-yard field goal.
But the Crimson Tide struck
back quickly in the fourth-quarter. driving 75 yards and taking the lead with 10:07 left on a 38-yard TD pass from Walter Lewis to Jesse Bendross. Three minutes later Linnie Patriek burst 15 yards around right end to seal the victo-

The triumph enabled Alabama to finish the regular season with a 9-1-1 mark and gave it a share of the Southeastern Cooference championship with Georgia. Both wound up with 6-0 SEC records. It was the ninth time in the last 11 years that Alabama either won or

Miami 37, Notre Dame 15

In Miami, quarterback Jim Kelly completed 17 of 25 passes for 264 yards to lead Miami over Notre Dame, 37-15.

The Fighting Irish finished with a 5-6 record, their first losing season since 1963. "It's on fun is it?"

said Notre Dame Coach Gerry Faust after the game Friday. sure don't want to go down in his-tory that way. It doesn't bother me, to be bonest with you. I hurt for the kids, that's the thing."

Kelly fired an 18-yard touch-down pass to Mike Rodrigue in the first period and teamed with Rocky Belk on a 63-yard scoring play oridway through the second period as the Hurricanes surged to a 30-6 halftime lead with the help of three Danny Miller field goals, Miami finished at 9-2 but, be-

cause of NCAA probation for recruiting violations, is barred from postseason play.

tors, who beat Florida State for the first time since 1976.

Jets Trounce Colts, 25-0, to Overtake Miami

From Agency Dispatches
NEW YORK — Freeman McNeil scored two touchdowns and Pat Leahy kicked four field goals Sunday as the New York Jets took over first place in the American Football Conference East with a 25-0 victory over Baltimore, sad-

dling the Colts with their 12th straight loss.

McNeil, the Jets' No. 1 draft choice, sprinted 30 yards for his first rushing TD of the season in the opening quarter and dived the final yard in the third period following Bruce Harper's 46-yard print return to the Colt 1-yard line. Leahy connected from the 37 and the 22 and twice from the 27 as the Jets (8-4-1) moved a half-game ahead of Miami, which plays Philadelphia Monday night. The

first winning season since 1969.
The Colts are 1-12, the worst record in the National Football League; the shutoul was their first since a 19-0 loss at Miami Nov. 11, 1979. The Jets' last shutoul victory came Nov. 14, 1976, 34-0 over

victory guaranteed the Jets their

Tampa Bay.
The Jets sacked quarterback

total to a league-leading 54. Jones, intercepted once, completed 13 of 24 passes for 135 yards, while the Jets' Richard Todd, facility little essure, hit 16 of 28 attempts for

143 yards.

McNeil, who finished with 93 yards on 24 carries, scored the only touchdown the Jets needed 9:31 into the game when he burst through the middle, cut to the right around safety Bruce Laird and raced untouched into the end zone. His other score came 2:49 into the second half, three plays after Harper's run down the left

In the 62-yard, five-play drive capped by McNeil's 30-yard scoring sprint, Todd completed passes of 16 and 17 yards to tight end Jerome Barkum. On New York's next possession, the score rose to 10-0 on Leahy's 37-yard field goal 1:35 into the second quarter.

Steelers 24, Rams 0

In Pittsburgh, Franco Harris, breaking O. J. Simpson's NFL record for most career carries, rushed for 114 yards and a touchdown to lead the Steelers to a 24-0 Bert Jones five times for 40 yards victory over punchless Los Ange-in losses, raising their season sack les. The Rams suffered their

fourth-straight loss, their longest losing streak since 1966 and their first shotout since a 1978 playoff loss to Dallas.

The durable Harris, a 10-year veteran who has never had a serious injury, carried 18 times to raise his career total to 2,420 to break Simpson's record of 2,404. He scored on a 1-yard run for his 84th career touchdown, moving him past Jim Taylor into second place on the all-time list behind Jim Brown's record of 106. After Harris' touchdown opened

the scoring quarterback Terry Bradshaw hit Lynn Swann with a 9-yard scoring pass on the opening play of the second quarter. Harris set up the score with a 50-yard run, his longest this season.

The 8-5 Steelers knocked starting quarterback Pat Haden from the game with an injured right shoulder; Haden was hurt after throwing an interception to line-backer Jack Ham.

The Steelers intercepted three passes off backup Dan Pastorini. Cornerback Mel Blownt picked off two to raise his career total to 51 and linebacker Jack Lambert added the other.

The Rams managed two first downs in the first half, entering Pittsburgh territory only by recovexing a fumble. Their only scoring chance died when Frank Corral's field goal attempt was blocked. At 5-8, Los Augeles will have its first nonwinning season since 1972.

Cardinals 27, Patriots 20 lu Foxboro, Mass., rookie quarterback Neil Lomax fired a 33-yard touchdown pass to Roy Green

manlike conduct penalty against the New England bench. The pen-alty moved the ball to the Parriot 48-yard line. With a third-and-8 sintation at the 33, Green gathered in the pass at the 29 and raced down the left sideline for the

The Patriots had tied the score with 2:54 left on Vagas Ferguson's 3-yard run that capped an 80-yard drive and John Smith's extra point. That erased the 20-13 lead St. Louis had taken with 9:11 left on Ottis Anderson's 14-yard TD run.

In Cleveland, quarterback Ken Anderson threw four touchdown passes, all in the first half, as Cincinnati defeated the Browns, 41-

Anderson, who completed 26 of 32 passes for 235 yards without an interception, connected on two scoring plays to Cris Collinsworth and one each to Pete Johnson and M.L. Harris. Johnson, who rushed for 105 yards, added touchdown runs of 1 and 11 yards in the fourth quarter.

Anderson increased his 1981 totals to 250 completions in 390 attempts for 25 touchdowns, both personal highs. Cincinnati imthe American Football Conference Central Division

The 5-8 Browns fumbled twice in the first period and Anderson made them pay both times. Dino Hall fumbled a punt away at the Brown 11-yard line, and three plays later Anderson hit Johnson with a 5-yard scoring pass. Full-back Mike Pruitt fumbled near with 33 seconds left, giving the St. back Mike Pruitt fumbled near Louis Cardinals a 27-20 victory over the New England Patriots.

back Mike Pruitt fumbled near midfield on the Browns' next posover the New England Patriots. session, and two plays later Ander-The completion climaxed a 78- son lofted a 39-yard pass to Colyard drive that was helped in the linsworth to make the score 14-0.

ing works of genius (his wish-bone offense is winning while others have died) and by knowing when time no longer can re-sist a good idea (he is 116-14-1 with integrated teams).

Mostly, he's done it by being Bear. Good folks, as they say down here. Loved his mama, loved his papa, loves his kids. Puts down a bucketful of whis-

key, but just good shiff. When the doctor told him this year to cut the cigarettes down to two a day, Bear thought he meant two Bengals 41, Browns 21

Ain't nobody in Alabama who wouldn't bring the Bear a cake. A pretty blonde, maybe 20, brought one to his office two days ago, and you should've seen the Bear's eyes get real young. "Hell," he said when she'd left, "if this was 40 years ago, I'd have kept her 'stead of the cake."

We're going to get to the part where President Reagan calls Bryant, but it's important to note here that the Bear doesn't mumble any more.

Danm Yankees

Them damn Yankees, Every time they come carpetbagging out of Bear's mumbles. So be got sensitive about it. For a Ford truck commercial, they sped up the sound track so you'd know what he said.

Down here they understand every word, like it was written by God's finger on stone tablets, but Yankees say the coach is going over the hill and proof is he can't talk clearly.

He sure can now. At 68, with the go-ahead from the state legfession.

Bowl." That was Jan. 1, 1938.

dio, when I played in the Rose As always, Bryant was modest in victory. Thanked everybody

players mostly. Said if be'd

Enhanced Euphemism

By William Safire

TEW YORK —The rise of "enhance" began in the 1960s with the need to spruce up monaural recordings for playback in stereo equipment. Salesmen called the stanc-erasing re-record-ing "enhanced sound"; sound engineers winced and called that a

quasi-technical term." The term 'enhanced sound' has been around for the last 10 years." estimates

Almon Clegg of Panasonic, and has been a generic term for the last three years. Our term for en-hanced sound is Satire 'ambiance.'

Over at Sony, Mark Finer explains that sound is enhanced with the use of different types of circuits that delay, in microseconds, the reception of the signal to the ears. This expands the stereo image." After wowing the lexicon of the

ambiance chasers (a punning coinage of Mrs. Muffie Brandon, now of the White House), "enhance" of the White House), "enhance" puffed itself up into the jargon of politico-military affairs. Instead of "neutron bomb," which sounded threatening we began to hear of "enhanced radiation weapons,"

which sounded comforting.
In 1978, the Pentagon — entranced with enhanced — started to use the word in connection with the F-15s which were being sold to Saudi Arabia. The Carter administration pledged to the Senate that it would not sell "enhancements" to the Saudis. "At that time," says Pentagon spokesman Mark Foutch, "the enhancement weapons were fuel tanks that would ex-tend the plane's range, and addi-tional air-to-surface weaponry." (Air-to-surface weapons used to be called "bombs," but bombs are no longer mere bombs when they are missiles. A bomb is dropped; a missile is shot. A "smart bomb," which seeks its target, is still

Art Objects Stolen in Peru

LIMA - Three thieves broke into Peru's National Archaeological Museum and stole 34 gold and silver objects from the Inca period, valued at a minimum of \$5 million. Police detained more than 100 people Saturday in a search after the theft Thursday.

"dropped." An enhanced radiation wcapon may be dropped, shot, or talked about a lot.)

But it was not until the word "enhance" recently came out of the mouth of Sen. Howard Baker in an economic setting that it can be said to have turned the hat trick in jargon use: "I'm willing to consider revenue enhancement in outyears," he said. "Revenue enhancement" is the gentle new term for "tax increase." This is a double euphemism: "Revenues" are what the government shovels in, and "taxes" are what the taxpayer forks over. Since it is less painful to receive than to give, "revenue" sounds nicer; on top of that, "increase" is harsh — enter "enhance," which lifts effortlessly off the ground. Pyc Chamberlayne of UPI Radio said: "Nothing in life is certain except Negative Patient Care Outcome and Revenue

The word is rooted in the Latin for "to raise," and came to English via Old French. In recent times, it has shifted its primary meaning from "to lift" or "to raise in value" to the current "to improve, to make more attractive." In the 16th century, however, it had a meaning which turned out to be prophetic An enhancer was one who raised prices. Hugh Latimer, in a sermon before Edward VI, denounced the "money makers, inhauncers and promoters of them selves."

Enhancement."

WHAT DID Baker mean when

he acquiesced in revenue enhancement "in outyears"?

"Think 'outyear;" writes Sen.
Daniel P. Moynihan in his newsletter to "Yorkers." That is the Sen. the term we use in the Senate Finance Committee for a tax provision that does not go into effect for one or two or three years after it is enacted."

"Outyear" - one word as used by insiders, two words as misused by outsiders - is a contribution of the budget arts to the language arts. " Outyear refers to future spending estimates," explains Glen Goodnow of the Congressional Budget Office; "The current year is fiscal '82; next January - 1982 — the president will present the budget year for fiscal '83; beyond that, fiscal '84, '85 and so on are

the outyears." Let's agree to write "outyear" as one word. That would end the confusion for those politicians who consider the Out Years as the parched period when they are not the Ins.

The Queen of Counterfeit Diamonds

By Stephanic Mansfield
Washington Post Service
WASHINGTON — The
contesse of contessa of counterfeit arrives at the door of a swank Washington restaurant, pulls her 4-foot-11-inch frame up to buss the blushing maitre d' and is whisked through the throng to

her table. "Honey. I'm responsible for more cheap weekends than any madam in the country," says Helen Ver Standig, better known as Madame Wellington, the 62year-old Washington widow who claims to be the world's largest diamond swindler.

Her voice sounds like the aftereffect of gargling with gravel. On the fourth finger of her right hand is a rock the size of a jawbreaker. "Of course it's a Wellington," she says. She slips off the ring and holds

it up. The crystal gem sparkles brilliantly. It looks like a diamond. It feels like a diamond. And, as Madame Wellington tells her customers, if you think it's a diamond, well bubbie, it is a diamond.

Booming Business

Spurred by the high price of al diamonds, increasing crime and skyrocketing insurance rates, the ersatz ice biz is booming. Especially in Washington, where the Reagan administration has lined up so many Heavy Glitters.

What started out in 1966 as a tongue-in-cheek mail-order marketing idea has grown into a mul-timilion-dollar business, with eight retail stores across the the United States and 200 employes. This year, Ver Standig, who teaches marketing at the Whar-

ton School of Finance at the University of Pennsylvania, was the first woman recipient of the Jo-seph Wharton Award for her contribution to the world of busi-ness. She also owns four radio stations and a resort hotel on Cape Cod. "Tin not a golfer or a tennis lady or a bridge lady. All I know how to do is work and have a good time."

\$150 a Carat

She drives a gray Mercedes (li-cense plate: "MME W"), a 1964 Cadillac ("It's in MINT condition. I keep it better than my body"), discos at Pisces, lunches at Mel Krupin's, shares her Rock Creek Park bouse with two maids, five dogs and a cat and says she travels "any damn place

Helen Ver Standig decked out in Wellingtons.

I want to go." Usually it's La. Costa in January, Palm Beach in February, St. Croix in March

and Cape Cod for the summer. She sells the \$150-a-carat counterfeits (as opposed to the average \$40,000-a-carat flawless diamond) to bankers, lawyers, actresses and actors, playboys, husinessmen, housewives and

Ver Standig claims she once sold a pair of fake diamond earrings to the White House, though she won't reveal the name of the first lady.

A native of Washington, D.C., 18-year-old Helen Van Stondeg was working in her father's dress shop one day in 1931 when a tall, handsome man came in. His name was M. Belmont Ver Standig, also known as Mac. The young man from Boston was in town looking for relatives. He took one look at the tiny, voluptuous daughter of the shopkeeper and asked her out for a drink.

Two nights later, Helen Van

Stondeg (in dusty rose dress, hat and high heels) and Mac Ver Standig (in white trousers and white crepe-soled shoes) were standing in front of a justice of the peace in Elkton, Md. Ver Standig slipped on his bride's fin-ger a \$15 diamond ring he had bought at Horning's Hock Shop

in Rosslyn. "We couldn't wait to

iumo in the sack." she says. "I'm

that kind of person to this day."

They lived in Massachusse for a time before Mac Ver Standig bought a newspaper in Greer, S.C. A year later he sold the paper, tried to enlist in the Army. was rejected because of a broken eardrum and in 1942 moved to Washington, where he started an advertising agency. The business blossomed, with billings of \$10

million a year. In 1961, while on a boat trip to Switzerland, Helen Ver Standig met a scientist who was working with laser beams, trying to devel-op simulated diamonds using strontium titanite. Ver Standig loaned the scientist \$10,000.

Three years later, Mac Ver Standig developed an aneurysm and he and his wife sold the ad agency. By that time, Helen Ver Standig's Swiss scientist had finished his research.

She and her husband took out

full-page ads in the Wall Street Journal, offering the fake gems for \$40 a carat. The response was overwhelming: 20,000 orders within a few days, by her own estimate.

Next was coming up with a classy name for the counterfeits. Mac Ver Standig, who died in 1972, had always called his wife "Madame," and they ran through a few dozen test names

Some of her tales are as big as the Ritz. "When I first started this business," she says, "I had no idea how many dingbats there were out there. When I opened the Connecticut Avenue store, this guy walks in and buys a 14carat rock. It was my first sale. We have a 15-day return policy. Ten days later, he walks back in and says, "This is the greatest thing that ever happened.' Well, he wants another one. Then he wanted to take me for a drink."

They went to the Mayflower, she says, where the customer told her he had spent four days with a "\$1,000-a-night hooker." He gave her the diamond. She promptly went out and had it insured. "He said it cost her \$2,500 for the ap-praisal!" Ver Standig guffaws. "I have this guy in Texas. Eve-

ry solitary mouth, so help me God, he buys a 6-carat pear-ring mail order. He gives it to some broad! And every month I get a letter: 'Dear Madame Wellington. It's working Send an-

Last Christmas, she says, a man walked into the downtown store to look at men's rings. Somehow, he managed to switch a one-carat real diamond for a 3carat Wellington. He apparently hadn't noticed the words "counterfeit diamonds" in small print on the door.

"Unless they see the sign, they think it's a regular jewelry store," says Ver Standig. She says she had the real diamond appraised and gave it to her daughter for a pendant When her daughter married,

Ver Standig's son-in-law bought a 4-carat genuine diamond ring. "Everybody thinks it's a Welling-ton," Ver Standig says, "Poor Joanie, It's killin' her!"

Letter From Cyprus

Shopping Draws Turks To the Divided Island

By Sajid Rizvi

YRENIA, Cyprus - The N Turkish lira, assailed at home as a mercurial currency always dipping against the dollar, is strong and current in this sunny Mediterranean resort battling the effects of an old conflict.

"Call it a foreign currency if you like," said a coffee house waiter close to a jungle of white masts topping a line of blue, green, crimson and yellow hulls of yachts. "But you don't run, do you, to the bank each time you buy a drink or

"Whatever" is the word, since the lira buys all in the Turkish part of Cyprus — food, accommoda-tion, taxi ride or any of the numerous imported goodies stacked away in quiet, westernized stores which can't be had in Turkey because of an import ban prompted by chronic foreign exchange trou-

Price tags more often than not are written in liras, rather than Cypriot pounds.

Cypriot pounds.

It's the clearest illustration of Turkey's presence in Cyprus, matched only by its tanks and soldiers, the white crescent on a red ground that is the Turkish flag and acceptable of Marche Care. portraits of Mustafa Kemal Ata-türk, founder of modern Turkey.

There are now more than 125 siras to a U.S. dollar — the rate fluctuates daily. About 300 liras buy a plate of fried fish with green salad, against three times as much charged by a similar food shop in

Skip the fish and take home a kilo of coffee, another banned item in Turkey, and the visiting Turk stills pay two-thirds less at the price here of \$2.50. Forget both fish and coffee and

get, instead, a bottle of Scotch. In Turkey it costs \$17 a liter — three times the price in Cyprus — with all the hassle of dealing with a black marketeer. Most Torks long ago switched to local gin.

It's those little pleasures of life that have turned north Cyprus into a haven for Turkish tourism, while the Greek and Turkish Cypriot leaders wrestle with political disputes festering since Turkey's armed forces took over the northern section of the island in July,

The Greek south still is Cyprus, but the north is now considered by the Turks to be an independent Turkish federated state, ruled by Turkish Cypnots from the upper

end of the divided capital, Nicosia (Lelkosha in Turkish). For 24,000 Turkish liras, less than \$200, Turkish Cypriot Airways flies you between north Cyprus and Ankara, Turkey's capital, with a week in a good hotel, breakfast and a meal a day thrown

A ferry to and from the Turkish Mediterranean coast costs just under \$50. No wonder Turks travel

by the hundreds. "Many go just for the Scotch coffee and cigarettes, and want to spend the least on getting there," said a hotel manager in Tasnen), on the Turkish coast.

Turkish-Cypriot merchants get the goods from the Greek side how is open to all manner of spec-ulation. Having lost much of their trade in the island's division, most are happy to have the Turkish shoppers.

But officials in Ankara can't help watching, and customs checks ensure travelers don't overspend or turn a Cyprus holiday into a black marketeers' connection.

Customs inspectors are tough on any Turkish passenger carrying home more than a kilo of collee, one bottle of liquor and two pack-

ets of American cigarettes.
Turks also cannot take out of
Turkey more than \$500 in Turkish currency, but many do, mostly to gamble in casinos, banned in Turkey itself.
The casinos are out of bounds

for Cypriots, unless they can come up with a British passport ob-tained during the British rule on Despite all the air of a holiday

resort, anxious residents wonder where the continuing friction will lead the Greek and Turk Cypriot

communities.

"Cyprus will never be what it was before 1974," said an English-speaking resident as Turkish trucks, cars and minibuses rolled into a ferry headed for Turkey. This part is ours, that is theirs? he said, referring to the Greeks be-youd the dividing line.

A few Turks looked up as he spoke. Then they joined the throng
